2017 ANNUAL REPORT

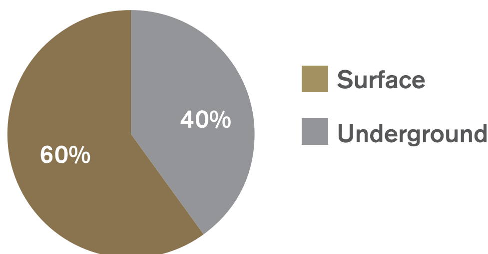
STRONG CANADIAN FOUNDATION | EXPANDING GLOBAL PRESENCE

PROFILE

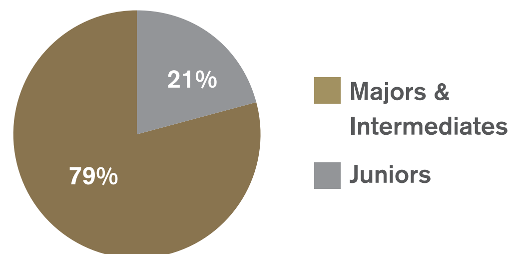
Headquartered in Val-d'Or, Quebec, Orbit Garant is one of the largest Canadian-based mineral drilling companies, providing both underground and surface drilling services in Canada and internationally through its 221 drill rigs and approximately 1,100 employees. Orbit Garant provides services to major, intermediate and junior mining companies, through each stage of mining exploration, development and production. The Company also provides geotechnical drilling services to mining or mineral exploration companies, engineering and environmental consultant firms, and government agencies.

MARKET POSITION (BY PERCENTAGE OF REVENUE[1])

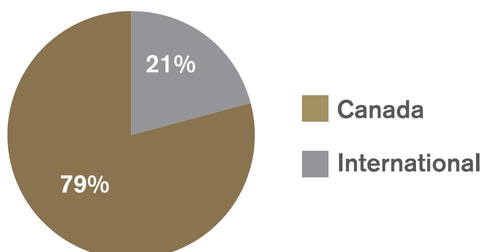
DRILLING ACTIVITY



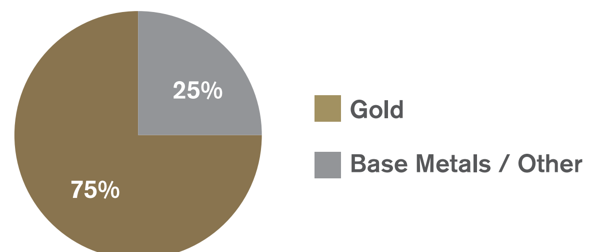
CUSTOMERS



REGIONS



RESOURCE EXPOSURE



1. For the year ended June 30, 2017

Demand for our drilling services continued to strengthen in fiscal 2017. The fourth quarter of fiscal 2017 marked our tenth consecutive quarter of year-over-year revenue growth, and a quarter where our drill utilization rates reached their highest levels since fiscal 2012, the peak of the last mining cycle. The 1.3 million metres we drilled during the year was our highest total in five years. Our revenue for fiscal 2017 totaled $125.2 million, up 16.4 percent from a year ago.

Our positive business momentum reflects the gradual turnaround in the mining sector that started around the beginning of calendar 2016. Since the first trading day of 2016 (January 4, 2016) up until the date of this report (September 6, 2017) the S&P/TSX Global Mining Index was up approximately 56 percent, the spot price of gold was up 24 percent and the spot price for copper, the metal widely considered to be the most sensitive to macroeconomic activity was up approximately 56 percent. With improving market conditions, mining companies have been committing more capital to exploration and mine development activities, which has resulted in increased demand within the mineral drilling sector.

Our 7.4 percent revenue growth in Canada was primarily attributable to increased metres drilled, as pricing on existing contracts continues to reflect the highly competitive industry pricing from the past few years. Revenue growth of 72.1 percent from our international operations resulted from a full year of business activity in Chile following our acquisition of Captagua Ingeniería S.A in the second quarter of fiscal 2016, and from new projects in Kazakhstan, Guyana, Ghana and Burkina Faso.

With our growth in revenue, drilling volumes and utilization rates, we had expected to start realizing improved margins and earnings towards the end of fiscal 2017, however, pricing on existing domestic contracts, lower than expected productivity, and increased employee training and project mobilization costs, primarily in Canada, continued to impact our profitability as we ramped up our operations to meet increased customer demand. Our investment in expanding our international operations also impacted earnings. We reported EBITDA of $2.7 million in fiscal 2017, and a net loss of $5.9 million, or $0.17 a share. We expect our profitability to gradually improve in fiscal 2018. There are a number of important factors that underlie our positive outlook.

First, contract pricing is beginning to rebound from the levels experienced in the last few years. This is expected, as higher utilization rates in our industry inevitably lead to higher pricing. As we complete more of our old contracts and sign new contracts, or renew existing ones, at higher prices, our margins should expand. We are now seeing improvement in our new contracts, coinciding with our increasing drill utilization rates. Late in fiscal 2017, we renewed and obtained three important drilling contracts with a major customer for projects in Nunavut, representing potential revenue of more than $100 million over the next five fiscal years. Given the strong customer demand we're experiencing, we expect continued pricing improvement in the current fiscal year.

Secondly, in deploying a greater number of drill rigs and crews to meet the higher level of demand from our customers, we experienced lower productivity rates as we had to deploy less experienced drillers on certain projects, as well as higher project mobilization and employee training costs. Now that we have absorbed a high proportion of these costs in scaling up our operations, we are now in a stronger position to realize improving margins.

Thirdly, when we embarked on international expansion strategy less than two years ago, one of our long-term goals was to generate 25 percent of our consolidated revenue from international operations. In fiscal 2017, we generated 21 percent of our revenue from international operations, demonstrating our considerable progress towards reaching our goal. We have established operating subsidiaries in Burkina Faso, Chile, Ghana, Guyana and Peru. With this expanded international market presence now in place, we are now a more diversified drilling company, with new opportunities to drive future growth.

We believe the longer-term outlook is also positive for Orbit Garant. Through our steadfast commitment to continuous innovation, we have developed an industry-leading computerized monitoring and control drilling technology that is in demand around the world. We currently have 32 computerized underground drill rigs that are either currently in use on a project, or being mobilized for near-term deployment. With improved drilling accuracy, consistency of results, greater productivity, lower cost of consumables, and improved safety features, our next generation drilling technology is a key competitive differentiator for Orbit Garant. We expect it to play an increasingly vital role in securing new, high-profile drilling contracts in the years ahead.

Our vertically-integrated manufacturing capabilities which enable us to cost-effectively manufacture custom drill rigs, including our computerized drill rigs and equipment to fit the needs of our customers, will also continue to be a key competitive differentiator for Orbit Garant, particularly during periods of higher industry drill utilization.

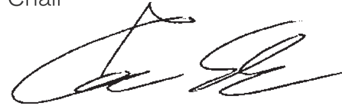
The declining gold reserves of major gold producers is another factor that supports our positive longer-term view. The relatively low levels of exploration spending over the past several years has resulted in a lack of significant new discoveries. This has resulted in a decline in the reserve life for major gold producers. According to a recent research report published by TD Securities, the total reserve life of the top global gold producers that they cover is at a 10-year low. TD estimates that the average total reserve life (including greenfield projects) for the large cap producers in their coverage universe is down approximately 34 percent from the peak in 2011. For the large gold producers to remain viable, they must eventually increase their reserves which will ultimately lead to increased exploration and development spending.

With our sound balance sheet, expanded international operations, recent investments in hiring and training employees, vertically-integrated manufacturing capabilities and our continued focus on technological innovation, we are well positioned to build value for our stakeholders as the mineral drilling sector continues to strengthen.

In closing, we extend our sincere appreciation for the hard work and dedication of our 1,100 plus employees worldwide. We would also like to acknowledge our Board of Directors for their guidance on strategic direction and corporate governance. Edmund Stuart will not stand for re-election as a Director at our upcoming Annual Meeting. We thank Ed for his nine years of service and leadership. And we thank you, our shareholders, for your continued support.

Sincerely,

Paul Carmel
Chair



Eric Alexandre
President and Chief Executive Officer

MD&A and Consolidated Financial Statements

YEAR END AND FOURTH QUARTER FISCAL 2017

SEPTEMBER 6, 2017

MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management Discussion and Analysis ("MD&A") is a review of the results of operations, the liquidity and the capital resources of Orbit Garant Drilling Inc. This discussion contains forward-looking statements. Please see ''Forward-Looking Statements'' for a discussion of the risks, uncertainties and assumptions relating to these statements.

This MD&A should be read in conjunction with the audited consolidated financial statements for the fiscal year ended June 30, 2017 ("Fiscal 2017") and June 30, 2016 ("Fiscal 2016") and the notes thereto which are available on the SEDAR website at WWW.sedar.com.

The Company's Fiscal 2017 audited consolidated financial statements and the accompanying notes were prepared in accordance with International Financial Reporting Standards ("IFRS"). All amounts in this MD&A are in Canadian dollars, except when otherwise noted.

In this MD&A, references to the "Company" or to "Orbit Garant" shall mean, as the context may require, either Orbit Garant Drilling Inc. or Orbit Garant Drilling Inc. together with its wholly owned subsidiaries.

This MD&A is dated September 6, 2017. Disclosure contained in this document is current to that date unless otherwise stated.

Percentage calculations are based on numbers in the Financial Statements and may not correspond to rounded figures presented in this MD&A.

Additional information relating to the Company, including the Company's Annual Information Form for the most recently completed fiscal year, can be found on SEDAR at www.sedar.com.

FORWARD-LOOKING STATEMENTS

Securities laws encourage companies to disclose forward-looking information in order for investors to have a better understanding of a company's future prospects and make informed investment decisions.

This MD&A contains forward-looking statements about the Company's objectives, strategies, financial condition, results of operations, cash flows and businesses. These statements are "forward-looking" because they are based on current expectations, estimates and assumptions about: the markets in which the Company operates; the world economic climate as it relates to the mining industry; the Canadian economic environment; and the Company's ability to attract and retain customers and to manage its assets and operating costs.

Actual results could be materially different from expectations if known or unknown risks affect the business, or if estimates or assumptions turn out to be inaccurate. The Company does not guarantee that any forward-looking statement will materialize and, accordingly, the reader is cautioned not to place reliance on these forward-looking statements.

The Company disclaims any intention and assumes no obligation to update any forward-looking statement, even if new information becomes available, as a result of future events or for any other reasons except in accordance with applicable securities laws. Risks that could cause the Company's actual results to materially differ from its current expectations are discussed in this MD&A. For a more complete discussion of the risk factors that could cause the Company's actual results to materially differ from its current expectations, please refer to the Company's Annual Information Form dated September 6, 2017, accessible via www.sedar.com.

FISCAL 2017 SUMMARY

- Revenue increased 16.4% to $125.2 million, up from $107.5 million in Fiscal 2016
- Gross margin was 6.4% compared to 9.5% in Fiscal 2016
- Adjusted gross margin (excluding depreciation expense) was 13.4%, down from 18.1% in Fiscal 2016
- EBITDA of $2.7 million, down from $11.1 million in Fiscal 2016
- EBITDA was $2.7 million, compared to adjusted EBITDA (excluding a one-time $5.0 million gain from negative goodwill, and $0.8 million in acquisition and integration costs) of $6.9 million in Fiscal 2016
- Net loss was $5.9 million, compared to a net loss of $0.2 million in Fiscal 2016
- Net loss was $5.9 million, compared to an adjusted net loss (excluding a one-time $5.0 million gain from negative goodwill and $0.8 million in acquisition and integration costs) of $4.7 million in Fiscal 2016
- Metres drilled in Fiscal 2017 totalled 1,293,350, an increase of 12.3% compared to 1,152,102 metres drilled in Fiscal 2016

Including the fourth quarter of fiscal 2017 ("Q4 FY2017"), Orbit Garant has now achieved ten consecutive quarters of year-over-year growth in revenue. Management is encouraged by this positive business momentum, following a prolonged period during which many senior and intermediate mining companies had scaled back their drilling programs, and junior mining companies significantly reduced their exploration activities due to a lack of capital, which resulted in an oversupply of drilling services capacity in the market and pricing pressure from customers. Orbit Garant's growth in revenue over the past ten fiscal quarters reflects: i) increasing customer demand and drilling volumes in Canada; and ii) increased international business activity resulting from the Company's strategy to expand its international operations in strategic markets. With this revenue growth momentum, Orbit Garant had expected to start realizing improved margins and earnings towards the end of Fiscal 2017. However, pricing on existing contracts, lower than expected productivity, and increased employee training and project mobilization costs, primarily in Canada, have continued to impact the Company as it continues to ramp up its operations to meet increased customer demand. The Company expects to generate increased profitability from higher utilization rates, improved productivity and price increases on new contracts in fiscal 2018. Orbit Garant has also made significant investments in expanding its international operations over the last 18 months, with new operating subsidiaries established in Burkina Faso, Chile, Ghana, Guyana and Peru. With these expanded international operations now established, the Company is well positioned to capture increased international market share and drive future growth.

CORPORATE OVERVIEW

From its head office in Val-d'Or, Québec, Orbit Garant, with approximately 1,100 employees and a fleet of 221 drill rigs, provides surface and underground drilling services to the mining and exploration industry in Canada and internationally. The Company also provides geotechnical drilling services to mining or mineral exploration companies, engineering and environmental consulting firms and government agencies. The majority of Orbit Garant's business activity is currently conducted in Canada. Orbit Garant has regional offices and facilities in Sudbury, Ontario and Moncton, New Brunswick to support its Canadian business activities. The Company has worked on international projects in the United States, Mexico, Guyana, Chile, Kazakhstan and West Africa. The Company has established international operating subsidiaries in: Santiago, Chile; Lima, Peru; Georgetown, Guyana; Ouagadougou, Burkina Faso; and Takoradi, Ghana.

Orbit Garant has a comprehensive infrastructure that is vertically integrated with its subsidiary, Soudure Royale, which manufactures drill rigs for the Company and third parties. Soudure Royale provides the Company with a competitive advantage in the provision of drilling services and equipment. Orbit Garant focuses on "specialized drilling", which refers to drilling projects that are in remote locations or, in the opinion of Management, because of the scope, complexity or technical nature of the work, cannot be undertaken by smaller conventional drilling companies.

The Company has two operating segments: Canada (including surface drilling, underground drilling and manufacturing Canada), and International.

For Fiscal 2017:

- Specialized drilling services, which typically generate a higher gross margin than conventional drilling services, accounted for approximately 53% of the Company's total revenue, compared to 50% in Fiscal 2016.
- Approximately 75% of the Company's revenues were generated by gold related operations, and approximately 25% were generated by base metal related and other operations.
- Surface and underground drilling services accounted for approximately 60% and 40%, respectively, of the Company's revenue.
- Approximately 79% of Orbit Garant's revenue was generated from major and intermediate mining company projects, in line with Fiscal 2016. Orbit Garant's drilling contracts with major and intermediate customers are typically from one to five years in length.
- Approximately 79% of Orbit Garant's revenue was generated from domestic drilling projects, and approximately 21% was generated from international drilling contracts.

BUSINESS STRATEGY

Orbit Garant's goal is to be the leading Canadian-based mineral drilling company. This will be achieved through the pursuit of both domestic and international market opportunities and through the provision of best-in-class underground and surface drilling services, equipment and personnel for all stages of the mining and minerals business, including exploration, development and production. The Company employs the following business strategies:

- Focus primarily on major and well-financed intermediate mining and exploration companies operating in stable jurisdictions;
- Provide conventional, specialized and geotechnical drilling services;
- Manufacture customized drills and equipment to fit the needs of customers;
- Maintain a commitment to Research and Development ("R&D") and advanced drilling technologies, such as the Company's current implementation of computerized monitoring and control technologies;
- Provide training for the Company's personnel to continuously improve labour efficiency and the availability of a skilled labour force;
- Maintain a high level of health and safety standards in the workplace and promote protection of the environment;
- Establish and maintain long-term relationships with customers;
- Cross-sell drilling services to existing customers;
- Expand the Company's base of operations in strategic regions, such as the Company's acquisition of Captagua Ingeniería S.A. ("Captagua"), based in Santiago, Chile, in December 2015. On August 16, 2016, the name of Captagua was changed to Orbit Garant Chile S.A. ("OG Chile");
- Maintain a sound balance sheet and a judicious deployment of capital; and
- Evaluate strategic acquisition opportunities to enhance value for the Company's stakeholders.

INDUSTRY OVERVIEW

Orbit Garant provides drilling services, in Canada and internationally, to the minerals industry through all stages of mine development, from exploration through production. Client mining companies consist of major (or senior), intermediate, and junior companies (which generally focus on exploration only). Mining companies' budgets for external drilling services, such as those offered by Orbit Garant, are typically determined by ferrous (iron) and non-

ferrous (precious and base) metals prices, and the availability of capital to finance exploration (particularly in the case of juniors) and development programs, and/or ongoing mining operations.

Gold

Gold prices are determined by the balance between supply (primarily mine production) and the many sources of demand including global investment demand, global demand for gold jewelry, and to a much lesser extent, demand from industrial applications. Following a prolonged rally in the price of gold that started in 2001 and resulted in a peak price of more than US$1,900 per ounce in September 2011, the price of gold entered a period of overall decline starting in January 2013, when it was at approximately US$1,700 per ounce. The spot price of gold reached a trailing five-year price low of approximately US$1,049 per ounce in December 2015. The price of gold strengthened in 2016 reaching a high of approximately US$1,375 per ounce, and ended the year at a spot price of approximately US$1,151 per ounce. Gold prices traded primarily in a range between US$1,200 and US$1,300 an ounce in the first half of 2017. However, prices have rallied sharply since mid-July. At the time of this report, the spot price of gold was approximately US$1,340 an ounce, an increase of 27.7% from its trailing five-year price low in December 2015, and an increase of 16.4% since the start of 2017.

Base Metals

Base metals' prices generally reflect global economic conditions, as these metals are used primarily in infrastructure, industrial and manufacturing applications. Demand from emerging markets, particularly China and India, has a major influence on base metals markets. As emerging markets advance their economic development, their infrastructure and industrial bases expand. Further, residents typically become more affluent, driving increased demand for manufactured goods.

Aluminum, copper, lead, nickel and zinc are the primary base metals. At the time of this report, the respective spot prices for aluminum, copper, lead and zinc were significantly higher than 12 months ago. The spot price of nickel is slightly higher than it was 12 months ago, but has risen less than the other primary base metals. The spot price for copper, the metal widely considered to be the most sensitive to macroeconomic activity, was approximately US$2.10 per pound a year ago and at the time of this report was approximately US$3.12 per pound, an increase of 48.6%. The spot price for nickel is currently near the lower end of its five-year price range, the spot price for copper is near the midpoint of its five-year price range, the spot prices for aluminum and lead are near the upper end of their five-year price ranges, and the spot price for zinc is at a five-year high.

Iron Ore

Iron ore prices are determined by the global demand for steel, as more than 95% of mined iron ore is used to make steel. As both the world's largest consumer and producer of steel, China is widely regarded as having the most influence on global iron ore market prices. Continuing urbanization of the world's population, particularly in China and India, the world's most populous countries, is fueling global steel consumption, and long-term demand is expected to continue to trend higher. In the short term, the spot price of iron ore is principally affected by seasonal effects, short term mismatches between supply and demand and other factors. The price of iron ore fell sharply in 2014 and 2015, but rebounded in 2016 and early 2017. The price declined between March and June of 2017, but has subsequently rallied. At the time of this report, the spot price of iron ore was approximately US$76 per tonne, compared to approximately US$60 per tonne one year ago. Despite the increase over the last 12 months, iron ore remains well below its trailing five-year high of approximately US$150 per tonne.

Market Participants

There were a number of positive developments in the mining sector in the first half of 2017, as the industry continued to build on a market recovery that began in early 2016. Metal prices have increased, and mining companies have raised significant amounts of capital. According to TMX Group, mining companies listed on the TSX and TSX-Venture exchanges completed a total of 705 financings in the first six months of 2017, similar to the 738 financings they completed in the same period in 2016. This compares to just 553 financings in the first six months of 2015. Notably, junior mining companies on the TSX Venture Exchange raised $1.9 billion of equity capital in the first six months of 2017, nearly double the $1.0 billion they raised in the same period in 2016, and triple the $584 million they raised in the first six months of 2015. With a greater number of mining companies now armed with more cash and stronger balance sheets, spending on mineral exploration and mine development has been increasing. As a result, drill utilization rates have increased and the global oversupply of mineral drilling services capacity is declining. The Company expects these factors to drive higher demand for drilling services and improved pricing on customer contracts.

OVERALL PERFORMANCE

Results of operations for the year ended June 30, 2017

FISCAL YEAR ENDED JUNE 30 * ($millions)	Fiscal 2017	Fiscal 2016	2017 vs. 2016 Variance

[(2)] EBITDA = Earnings before interest, taxes, depreciation and amortization. See "Reconciliation of non-IFRS financial measures"

During Fiscal 2017, Orbit Garant drilled 1,293,350 metres, a 12.3% increase from 1,152,102 metres drilled in Fiscal 2016. The Company's average revenue per metre drilled in Fiscal 2017 was $96.53 up 5.6% from $91.40 in Fiscal 2016. The increase in average revenue per metre drilled is primarily attributable to the Company's specialized drilling activity in Chile, which is priced at a higher rate than conventional drilling.

The Company had 221 drill rigs at the end of June 30, 2017, compared to 226 drill rigs at end of Fiscal 2016. During Fiscal 2017, Soudure Royale manufactured eight new drill rigs, including three new computerized drill rigs, while six conventional drill rigs were dismantled and seven were sold.

RESULTS OF OPERATIONS

FISCAL 2017 COMPARED TO FISCAL 2016

Contract Revenue

Revenue in Fiscal 2017 totalled $125.2 million, an increase of $17.7 million, or 16.4%, from $107.5 million in Fiscal 2016. Revenue growth was primarily attributable to an increase in domestic and international metres drilled.

Canada revenue was $99.3 million in Fiscal 2017, an increase of $6.9 million, or 7.4%, from $92.4 million in Fiscal 2016. The increase was primarily attributable to a higher number of metres drilled.

International revenue totalled $25.9 million in Fiscal 2017, compared to $15.1 million in Fiscal 2016, an increase of $10.1 million, or 72.1%. International revenue growth was primarily attributable to a full year of operations in Chile following the acquisition of Captagua (now "OG Chile") in the second quarter of Fiscal 2016, and revenue from new projects in Kazakhstan, Guyana, Burkina Faso and Ghana.

Gross Profit and Margins (see Reconciliation of non-IFRS measures)

Gross profit for Fiscal 2017 was $8.0 million, compared to $10.2 million in Fiscal 2016. Gross margin was 6.4% compared to 9.5% in Fiscal 2016. In accordance with IFRS, depreciation expenses totalling $8.7 million are included in cost of contract revenue for Fiscal 2017, compared to $9.3 million in Fiscal 2016. Adjusted gross margin, excluding depreciation expenses, was 13.4% in Fiscal 2017, compared to 18.1% in Fiscal 2016. The decrease in gross profit, gross margin and adjusted gross margin was primarily attributable to lower productivity, and increased employee training and project mobilization costs in Canada, as the Company ramps up its operations to meet increased demand, partially offset by the Company's significant increase in gross profit from international drilling activities.

General and Administrative Expenses

General and administrative (G&A) expenses were $14.7 million (representing 11.8% of revenue) in Fiscal 2017, compared to $14.3 million (representing 13.3% of revenue) in Fiscal 2016 reflecting the Company's expanded international operations.

Operating Results

Loss from operations for Fiscal 2017 was $3.9 million, compared to a loss from operations of $0.2 million in Fiscal 2016.

Drilling Canada's operating earnings totalled $0.6 million, compared to operating earnings of $4.5 million in Fiscal 2016. The negative variance was primarily attributable to lower productivity and increased employee training and project mobilization costs, as the Company ramps up its operations to meet increased demand.

Drilling International's operating loss totalled $4.5 million, compared to an operating loss of $4.7 million in Fiscal 2016. The operating loss reflects the Company's continued investments in expanding its international business operations.

Negative Goodwill

The Company recognized a one-time $5.0 million gain in the fourth quarter of Fiscal 2016, resulting from negative goodwill associated with the acquisition of Captagua (now "OG Chile") in December 2015. The negative goodwill resulted from the excess of the fair value of the acquired assets over the aggregate of the liabilities assumed and consideration paid. No negative goodwill was recorded in Fiscal 2017.

Foreign Exchange (Gain) Loss

Foreign exchange loss was $0.2 million in Fiscal 2017, compared to a foreign exchange loss of $0.6 million in Fiscal 2016.

EBITDA (see Reconciliation of non-IFRS measures)

Earnings before interest, taxes, depreciation and amortization ("EBITDA") was $2.7 million in Fiscal 2017, compared to $11.1 million in Fiscal 2016. Excluding the one-time $5.0 million gain resulting from negative goodwill, and acquisition and integration costs of $0.8 million, both associated with the acquisition of Captagua, Fiscal 2016 adjusted EBITDA was $6.9 million.

Financial Expenses

Interest costs related to long-term debt and bank charges were $1.0 million in Fiscal 2017, compared to $0.7 million in Fiscal 2016.

Income Tax Recovery

Income tax recovery was $2.0 million for Fiscal 2017, compared to income tax recovery of $0.2 million in Fiscal 2016.

Net Loss

The Company's net loss for Fiscal 2017 was $5.9 million, or $0.17 per share, compared to a net loss of $0.2 million, or $0.01 per share, in Fiscal 2016. Lower gross profit and margins, as discussed above, contributed to the Company's net loss for Fiscal 2017. The Company's net loss for Fiscal 2016 includes a $5.0 million one-time gain related to negative goodwill and $0.8 million of acquisition and integration costs, both related to the acquisition of Captagua. Excluding these items, the Company's net loss for Fiscal 2016 would have been $4.7 million, or $0.13 per share.

SUMMARY ANALYSIS OF FISCAL 2016 COMPARED TO FISCAL 2015

Revenue for Fiscal 2016 was $107.5 million compared to $79.0 million for the fiscal year ended June 30, 2015 ("Fiscal 2015"), representing an increase of $28.5 million, or 36.2%.

Gross profit for Fiscal 2016 was $10.2 million, compared to $3.2 million in Fiscal 2015. Gross margin for Fiscal 2016 was 9.5% compared to 4.1% in Fiscal 2015. Adjusted gross margin, excluding depreciation expenses, was 18.1% in Fiscal 2016, compared to 15.2% in Fiscal 2015. The increase in gross profit, gross margin and adjusted gross margin was primarily attributable to increased metres drilled in Canada and internationally, and increased international specialized drilling activity, which typically generates higher margins than conventional drilling activity.

Net loss in Fiscal 2016 totalled $0.2 million ($0.01 per share), compared to a net loss of $7.4 million ($0.22 per share) in Fiscal 2015.

	- Diluted	**(0.05)**	(0.06)	(0.05)	(0.01)	**0.12**	(0.07)	(0.05)	0.12

(1) Includes amortization and depreciation expenses related to operations.

The Company recognized a one-time $5.0 million gain in Q4 FY2016, resulting from negative goodwill associated with the acquisition of Captagua (now "OG Chile") in December 2015. No negative goodwill was recorded in Q4 FY2017.

SEASONALITY

The Company's revenue reflects certain seasonal factors. In underground drilling operations, scheduled mine shutdowns over holiday and summer periods at some locations reduce revenue during these periods. In domestic and international surface drilling operations, weather conditions in the spring and fall seasons often cause drilling programs to pause, or to be planned around seasonal fluctuations.

ANALYSIS OF THE FOURTH QUARTER OF FISCAL 2017 COMPARED TO THE FOURTH QUARTER OF FISCAL 2016

Contract Revenue

Revenue for the three-month period ended June 30, 2017 ("Q4 FY2017") totalled $37.4 million, an increase of $4.0 million, or 11.7%, from $33.4 million for the quarter ended June 30, 2016 ("Q4 FY2016"). Revenue growth was attributable to increased drilling activity in both Canada and internationally.

Canada revenue totalled $30.4 million in Q4 FY2017, an increase of $3.3 million, or 12.2 %, compared to $27.1 million in Q4 FY2016. The increase was primarily attributable to a higher number of metres drilled.

International revenue increased 9.4% to $6.9 million in Q4 FY2017, compared to $6.3 million in Q4 FY2016. The increase was primarily attributable to increased specialized drilling activity in Chile, partially offset by a decline in drilling volumes in Guyana and Kazakhstan.

Gross Profit and Margins (see Reconciliation of non-IFRS measures)

Gross profit for Q4 FY2017 was $2.4 million, a decrease of $1.9 million from $4.3 million in Q4 FY2016. Gross margin for Q4 FY2017 was 6.6% compared to 12.8% in Q4 FY2016. In accordance with IFRS, depreciation expenses totalling $1.9 million are included in cost of contract revenue for Q4 FY2017, compared to $2.3 million in Q4 FY2016. Adjusted gross margin, excluding depreciation expenses, was 11.8% in Q4 FY2017, compared to adjusted gross margin of 19.7% in Q4 FY2016. The decrease in gross profit, gross margin and adjusted gross margin was primarily attributable to lower productivity, and increased employee training and project mobilization costs in Canada, as the Company ramps up its operations to meet increased customer demand. The Company's lower gross profit and margins in Q4 FY2017 also reflect lower drilling volumes in Guyana and Kazakhstan and a decline in specialized drilling activity in Canada.

General and Administrative Expenses

G&A expenses were $3.6 million (representing 9.7% of revenue) in Q4 FY2017, compared to $3.7 million (representing 11.1% of revenue) in Q4 FY2016.

Operating Results

Loss from operations for Q4 FY2017 was $0.2 million, compared to earnings from operations of $1.4 million in Q4 FY2016.

Drilling Canada's operating earnings totalled $1.3 million, compared to operating earnings of $2.2 million in Q4 FY2016. The decline was primarily attributable to lower productivity and increased employee training and project mobilization costs. Drilling Canada's operating earnings in Q4 FY2017 were also impacted by a decrease in specialized drilling activity, which is charged at a higher rate than conventional drilling.

Drilling International's operating loss totalled $1.5 million, compared to an operating loss of $0.8 million in Q4 FY2016. The increased operating loss is primarily attributable to higher fixed costs reflecting the Company's continued

international business expansion, and lower drilling volumes in Guyana and Kazakhstan, partially offset by increased drilling activity in Chile.

Negative Goodwill

The Company recognized a one-time $5.0 million gain in Q4 FY2016, resulting from negative goodwill associated with the acquisition of Captagua (now "OG Chile") in December 2015. No negative goodwill was recorded in Q4 FY2017.

Foreign Exchange (Gain) Loss

Foreign exchange loss was $0.3 million in Q4 FY2017, in line with Q4 FY2016.

EBITDA (see Reconciliation of non-IFRS measures)

EBITDA was $0.7 million in Q4 FY2017, compared to $7.9 million in Q4 FY2016, a decrease of $7.2 million.

Adjusted EBITDA, excluding the $5.0 million gain related to negative goodwill and $0.1 million in acquisition and integration costs, was $3.0 million in Q4 FY2016.

Financial Expenses

Interest costs related to long-term debt and bank charges were $0.3 million in Q4 FY2017, In line with Q4 FY2016.

Income Tax (Recovery)

Income tax recovery was $0.2 million in Q4 FY2017, compared to an income tax payable of $0.6 million in Q4 FY2016.

Net Earnings (Loss)

Net loss for Q4 FY2017 was $1.6 million, or $0.05 per share, compared to net earnings of $4.4 million, or $0.12 per share, in Q4 FY2016. Lower gross profit and margins, as discussed above, contributed to the Company's net loss for Q4 FY2017. The Company's net earnings for Q4 FY2016 include a $5.0 million one-time gain related to negative goodwill and $0.1 million of acquisition and integration costs, both associated with the acquisition of Captagua. Excluding these items, the Company's net loss for Q4 FY2016 would have been approximately $0.5 million, or $0.02 per share.

EFFECT OF EXCHANGE RATE

Aside from the US dollars, Chilean Pesos, XOF and GHS cedi referenced below, all of the Company's revenue was denominated in Canadian dollars. The Company's main exposure to exchange rate fluctuations arose from certain purchases denominated in US dollars and Chilean Pesos, which were partially offset by revenue of approximately $5.8 million earned in US dollars and $20.2 million in Chilean Pesos, related primarily to international drilling activities. As at June 30, 2017, the Company had US $1.0 million in cash (June 30, 2016, US $1.5 million) and accounts receivable of US $0.6 million (June 30, 2016, US $0.6 million). The Company has cash in Chilean Pesos for an amount of CLP 207,424,327 (June 30, 2016, CLP292,449,849) and accounts receivable in Chilean Pesos for an amount of CLP1,471,946,677 (June 30, 2016, CLP1,076,241,833). The Company has cash in GHS cedi for an amount of 26,065 (June 30, 2016, 131,758) and accounts receivable in GHS cedi for a amount of 1,561,986 (June 30, 2016, 519,382). The Company has cash in XOF for an amount of 12,751,223 (June 30, 2016, nil).

As at June 30, 2017, the Company estimated that a 10% increase or decrease of the US dollars, Chilean Pesos, GHS cedi and XOF exchange rates would have caused an annual increase or decrease of approximately $0.4 million in net earnings and comprehensive earnings (June 30, 2016, $0.2 million).

LIQUIDITY AND CAPITAL RESOURCES

Operating Activities

Cash flow from operations (before changes in non-cash operating working capital items, finance costs and income taxes paid), was $2.5 million in Fiscal 2017, compared to $5.8 million in Fiscal 2016.

The change in non-cash operating working capital items was an outflow of $3.2 million in Fiscal 2017, compared to an inflow of $4.7 million in Fiscal 2016. The change in non-cash operating working capital in Fiscal 2017 was primarily attributable to:

- $3.4 million related to an increase in accounts receivable and prepaid expenses,
- $3.4 million related to an increase in inventory to support level of operation, partially offset by
- $3.6 million related to an increase in accounts payable.

Investing Activities

Cash used in investing activities totalled $6.2 million in Fiscal 2017, the same as in Fiscal 2016. During Fiscal 2017, $7.8 million was used for the acquisition of property, plant and equipment, partially offset by a cash inflow of $1.6 million on disposal of investments, property, plant and equipment. In Fiscal 2016, $6.6 million was used for the acquisition of property, plant and equipment, partially offset by a cash inflow of $0.6 million on disposal of investments, property, plant and equipment.

Financing Activities

During Fiscal 2017, the Company generated $7.0 million from financing activities, compared to a repayment of $2.3 million in Fiscal 2016.

The Company withdrew a net amount of $7.6 million during Fiscal 2017 on its secured, three-year revolving credit facility (the "Credit Facility") with National Bank of Canada Inc. (the "Lender"), compared to a reimbursement of $0.4 million in Fiscal 2016. The Company's long-term debt under the Credit Facility, including current portion, was $13.6 million as at June 30, 2017, compared to $7.4 million as at June 30, 2016. The Company's debt was incurred to support working capital requirements and the acquisition of capital assets, principally property, plant and equipment. In addition to the above, the Company provided a letter of credit to a bank of one of its subsidiaries of US$1.0 million (or approximately CAN$1.3 million) from the credit facility. The purpose of the letter of credit is to provide performance bonds to secure drilling contracts with some of its customers.

In December 2016, the Company entered into a credit facility with Export Development Canada in the amount of $2.5 million. The purpose of the loan was to assist in financing capital expenditure requirements for the Company's international activities. Interest on the outstanding principal amount is calculated at the rate of interest equal to the sum of the prime rate plus 4.5% per annum. The loan is guaranteed by a second ranking security interest over all of the Company's present and after-acquired personal and movable property.

The Company's Chilean subsidiary enters into receivable purchase agreements (commonly referred to as "factoring agreements") with different banks as part of its normal working capital financing. The Company receives 100% of the value of the specific sales invoice less a charge of between 0.46% and 0.52%. As at June 30, 2017, trade receivables include $0.7 million related to factored accounts, compared to $1.4 million in Fiscal 2016.

The Company made capital lease payments (net of proceeds from finance lease) of $1.0 million, compared to $0.7 million in Fiscal 2016.

The Company generated $0.1 million from the issuance of shares, related to the exercise of stock options.

As at June 30, 2017, the Company's working capital was $30.8 million, compared to $42.9 million as at June 30, 2016. The decline in working capital resulted from the reclassification of the amount outstanding under the Credit Facility from non-current to current liabilities due to the fact that the maturity date of the Credit Facility is currently December 19, 2017. The Company's working capital requirements are primarily related to the funding of inventory and the financing of accounts receivable.

The Company believes that it will be able to generate sufficient cash flow to meet its current and future working capital expenditures and debt obligations. The Company's principal capital expenditures are related to the acquisition of drill rigs and property, plant and equipment.

Sources of Financing

Orbit Garant's primary sources of liquidity are from operations and borrowings under the Credit Facility.

The Credit Facility is used to fund working capital requirements and provide further flexibility to the Company's long-term acquisition program. The Credit Facility matures no later than December 19, 2017 and, therefore, the Credit Agreement has been reclassified as a current liability. The Company and the Lender are discussing a potential amendment and renewal of the Credit Facility to take into account the Company's current and expected financial position and the current market environment. The Company expects that availability under the Credit Facility will continue to provide it with sufficient liquidity to fund its working capital and capital asset acquisition requirements.

As at June 30, 2017, the Company had drawn $13.6 million ($7.4 million as at June 30, 2016) under the Credit Facility.

Availability under the Credit Facility is subject to a borrowing base that is determined by the value of the Company's inventory, accounts receivable and real estate. The Company expects that it will continue to have sufficient undrawn availability under the Credit Facility to fund its working capital and capital asset acquisition requirements. All of Orbit Garant's assets are pledged as security for the Company's obligations under the Credit Facility.

The Credit Facility contains covenants that limit the Company's ability to undertake certain actions, without prior approval of the Lender, including: i) mergers, liquidations, dissolutions and changes of ownership; ii) the incurrence of additional indebtedness; iii) encumbering the Company's assets; iv) guarantees, loans, investments and acquisitions that may be made by the Company; v) investing in or entering into derivative instruments, paying dividends and/or making other capital distributions to related parties; vi) capital expenditures exceeding mutually agreed upon limits; and vii) certain asset sales. The Credit Facility also contains a number of financial covenants that the Company must comply with if more than $12.5 million is drawn from the Credit Facility.

As at June 30, 2017, the Company complied with all covenants in the Credit Facility.

As at June 30, 2017, the Company had future contractual obligations as follows:

*($thousands)	Total	Less than 1 year	2-3 years	4-5 years
Long-term debt *	16,047	14,225	1,822	-
Operating leases *	983	720	221	42
Total *	17,030	14,945	2,043	42

OUTSTANDING SECURITIES AS AT SEPTEMBER 6, 2017

Number of common shares	36,094,919
Number of options	2,265,500
Fully diluted	38,360,419

On December 6, 2016, the Company issued 500,000 options at an exercise price of $1.75. During Fiscal 2017, 993,500 options were exercised and 47,500 options were cancelled. In July and August 2017, 71,000 options were cancelled.

SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company's audited consolidated financial statements have been prepared in accordance with *International Financial Reporting Standards ("IFRS")*, as issued by the International Accounting Standard Board ("IASB"). The IFRS accounting policies set our below were consistently applied to all periods presented. Please refer to Notes 3 and 4 in the Company's consolidated financial statements for the year ended June 30, 2017 for a complete description of the Company's significant accounting policies.

The preparation of the consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates, assumptions and judgements. It also requires Management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant are disclosed in Note 5 in the Company's consolidated financial statements for Fiscal 2017.

These audited consolidated financial statements have been prepared on a historical cost basis, except for the investments, which have been presented at fair value of the identifiable assets and liabilities of the business acquired and share-based compensation. They are presented in Canadian dollars, which is the currency of the primary economic environment in which the Company operates ("functional currency"). All values are rounded to the nearest thousand dollars, except where otherwise indicated.

These audited consolidated financial statements were approved for issue by the Board of Directors of Orbit Garant Drilling Inc. on September 6, 2017.

Principles of Consolidation

The Company's audited consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company. A subsidiary is an entity controlled by the Company. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee, independently of its percentage of participation. The existence and effect of potential voting rights are considered when the Company controls another entity.

Income and expenses of subsidiaries acquired or disposed of during a period are included in the consolidated statement of loss from the effective date of acquisition to the effective date of disposal, as appropriate. Intercompany transactions and balances are eliminated on consolidation.

CRITICAL ACCOUNTING ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

The preparation of financial statements in accordance with IFRS requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and contingent liabilities on the reporting date, and amounts of revenues and expenses for the relevant period. Although management regularly reviews its estimates, actual results may differ. The impact of changes to accounting estimates is recognized in the period during which the change occurs, and in the affected future periods, when applicable. Areas in which the estimates and assumptions are significant or which are complex, are presented as follows:

Business combinations

On initial recognition, the assets and liabilities of the acquired business are included in the consolidated statement of financial position of the Company at their fair values. In measuring fair value, Management uses estimates about future cash flows and discount rates, however, the actual results may vary.

Impairment of long-financial assets

The Company also uses its judgement to determine whether an impairment test must be performed due to the presence of potential impairment indicators. In applying its judgement, the Company relies primarily on its knowledge of its business and the economic environment. As at June 30, 2017, the Company concluded that there were no impairment indicators and did not perform an impairment test (see Notes 11 and 12 in the Company's consolidated financial statements).

Income taxes

The Company is subject to income taxes in various jurisdictions. Judgement is required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due in the future. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It established provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

STANDARDS AND INTERPRETATIONS ADOPTED

The following standards and amendments to existing standards have been adopted by the Company on July 1, 2016:

- **IAS 16 – Property, Plant and Equipment**
- **IAS 38 – Intangible Assets**
- **IFRS 10 – Consolidated Financial Statements and IAS 28 – Investments in Associates and Joint Ventures, and**
- **IAS 1 – Presentation of Financial Statements**

Annual improvements to IFRS (2012-2014 Cycle), which include among others:

Amendments to IFRS 5, *Non-Current Assets Held for Sale and Discontinued Operations*
Amendments to IFRS 7, *Financial Instruments, and*
Amendments to IAS 34, *Interim Financial Reporting*

The standards and amendments listed above did not have any impact on the Company's consolidated financial statements.

RECENT ACCOUNTING PRONOUNCEMENTS

The Company has not early adopted the following new standards that have been issued, but are not yet effective:
IFRS 9 – Financial Instruments
IFRS 15 – Revenue from Contracts with Customers
IAS 7 – Statement of Cash Flows
IFRS 16 – Leases
Recognition of Deferred Tax Assets for Unrealized Losses (Amendments to IAS 12)
Classification and Measurement of Share-based Payment Transactions (Amendments to IFRS 2)
IFRIC Interpretation 22 – Foreign Currency Transaction and Advance Consideration
IFRIC 23 – Uncertainty over Income Tax Treatments

The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

RECONCILIATION OF NON - IFRS FINANCIAL MEASURES

Financial data has been prepared in conformity with IFRS. However, certain measures used in this discussion and analysis do not have any standardized meaning under IFRS and could be calculated differently by other companies. The Company believes that certain non-IFRS financial measures, when presented in conjunction with comparable IFRS financial measures, are useful to investors and other readers because the information is an appropriate measure to evaluate the Company's operating performance. Internally, the Company uses this non-IFRS financial information as an indicator of business performance. These measures are provided for information purposes, in addition to, and not as a substitute for, measures of financial performance prepared in accordance with IFRS.

<u>EBITDA:</u> Net earnings (loss) before interest, taxes, depreciation and amortization.

<u>Adjusted EBITDA:</u> EBITDA excluding negative goodwill and acquisition and integration expenses.

<u>Adjusted gross margin:</u> Contract revenue less operating costs. Operating expenses comprise material and service expenses, personnel expenses, other operating expenses, excluding depreciation.

EBITDA

The Corporation believes that EBITDA is an important measure when analyzing its operating profitability without being influenced by financing decisions, non-cash items and income taxes strategies. Comparison with peers is also easier as companies rarely have the same capital and financing structure.

Reconciliation of EBITDA

(unaudited) (in millions of dollars)	3 months ended June 30, 2017	3 months ended June 30, 2016	12 months ended June 30, 2017	12 months ended June 30, 2016	12 months ended June 30, 2015

Adjusted EBITDA	**0.7**	3.0	**2.7**	6.9	1.8

Adjusted Gross Margin

Although adjusted gross margin is not a recognized financial measure defined by IFRS, it is a widely recognized measure used in the mineral drilling industry. As a result, Management believes it provides a useful and comparable benchmark for evaluating the Company's performance.

(unaudited) (in millions of dollars)	3 months ended June 30, 2017	3 months ended June 30, 2016	12 months ended June 30, 2017	12 months ended June 30, 2016	12 months ended June 30, 2015

RISK FACTORS

The following are certain factors relating to the Company's business and the industry within which it operates. The following information is a summary only of certain risk factors and is qualified in its entirety by reference to, and should be read in conjunction with, the detailed information appearing elsewhere in this report and in the Company's Annual Information Form dated September 6, 2017. These risks and uncertainties are not the only ones relevant to the Company. Additional risks and uncertainties not currently known to the Company, or that the Company currently deems immaterial, may also impair the operations of the Company. If any such risks actually occur, the business, financial condition, liquidity and results of operations of the Company could be affected materially and adversely.

Risk Related to Structure to the Business and Industry

Cyclical Downturns

Demand for drilling services and products depends significantly on the level of mineral exploration and development activities conducted by mining companies, which in turn, are driven significantly by commodity prices. There is a continued risk that low commodity prices could substantially reduce future exploration and drilling expenditures by mining companies, which in turn, could result in a decline in the demand for the drilling services offered by the Company and would materially impact the Company's revenue, financial condition, cash flows and growth prospects.

Sensitivity to General Economic Conditions

The operating and financial performance of Orbit Garant is influenced by a variety of international and country-specific general economic and business conditions (including inflation, interest rates and exchange rates), access to debt and capital markets, as well as, monetary and regulatory policies. Deterioration in domestic or international general economic conditions, including an increase in interest rates or a decrease in consumer and business demand, could have a material adverse effect on the financial performance and condition, cash flows and growth prospects of the Company.

Reliance on and Retention of Employees

In addition to the availability of capital for equipment, a key limiting factor in the growth of drilling services companies is the supply of qualified drillers, on whom the Company relies upon to operate its drills. As such, the ability to attract, train and retain high quality drillers is a high priority for all drilling services providers. A failure by the Company to retain qualified drillers or attract and train new qualified drillers could have a material adverse effect on the Company's financial performance, financial condition, cash flows and growth prospects. In addition, rising rates paid to drillers and helpers will exert pressure on the Company's profit margins if it is unable to pass on such higher costs to its customers through price increases.

Increased Cost of Sourcing Consumables

When bidding on an underground drilling contract, the cost of sourcing consumables is a key consideration in deciding upon the pricing. Underground drilling contracts are typically for one to two years and expose the Company to an increase in the cost of consumables and labor during that period. A material increase in the cost of labor or consumables during that period could result in materially higher costs and could materially reduce the Company's financial performance, financial condition, cash flows and growth prospects.

Leverage and Restrictive Covenants

Orbit Garant entered into the Credit Agreement in order to provide it with credit facilities to fund, among other things, working capital and acquisitions. The degree to which Orbit Garant is leveraged could have important consequences, including: i) Orbit Garant's ability to obtain additional financing for working capital, capital expenditures or acquisitions in the future may be limited; ii) a significant portion of Orbit Garant's cash flow from operations may be dedicated to the payment of the principal of and interest on its indebtedness, thereby reducing funds available for future operations; and iii) certain of Orbit Garant's borrowings (including borrowings under the Credit Agreement) will be at variable rates of interests, which exposes Orbit Garant to the risk of increased interest rates which may have an adverse effect on Orbit Garant's financial condition.

The Credit Agreement contains numerous restrictive covenants that limit the discretion of Orbit Garant's Management with respect to certain business matters. These covenants place significant restrictions on, among other things, changes in ownership and the ability of Orbit Garant to create liens or other encumbrances, to pay dividends or make certain other payments, investments, acquisitions, capital expenditures, loans and guarantees and to sell or otherwise

dispose of assets and merge with another entity. In addition, the Credit Agreement contains financial covenants that require Orbit Garant to meet certain financial ratios and financial condition tests. A failure to comply with the obligations in the Credit Agreement could result in a default that, if not cured or waived, could permit acceleration of the relevant indebtedness. If the indebtedness under the Credit Agreement were to be accelerated, there can be no assurance that the assets of Orbit Garant would be sufficient to repay in full that indebtedness. In addition, the Credit Agreement will mature no later than December 17, 2019. There can be no assurance that future borrowings or equity financing will be available to Orbit Garant, or available on acceptable terms, in an amount sufficient to repay the Credit Agreement at maturity or to fund Orbit Garant's needs thereafter. This could have a material adverse effect on the business, financial condition and results of operations of Orbit Garant.

Access of Customers to Equity Markets

Economic factors may make it more difficult for mining companies, particularly junior mining companies, to raise money to fund exploration activity. This difficulty would have an adverse impact on the demand for drilling services and could have a material adverse effect on the financial performance, financial condition, cash flows and growth prospects of the Company.

Acquisitions

The Company is continuously seeking business acquisitions. It may be exposed to business risks or liabilities for which it may not be fully indemnified or insured. The ongoing integration of existing and new computer systems, equipment and personnel may impact the success of the acquisitions. Any issues arising from the integration of the acquired businesses, including the integration of the accounting software, may require significant management, financial or personnel resources that would otherwise be available for ongoing development and expansion of the Company's existing operations. If this happens, it may have a material adverse effect on the financial performance, financial condition, cash flows and growth prospects of the Company.

Supply of Consumables

If the Company should grow, it could put pressure on its ability to manufacture or otherwise obtain new drills and consumables required to conduct the Company's drilling operations. This could constrain the Company's ability to increase its capacity and increase or maintain revenue and profitability.

Competition

The Company faces considerable competition from several large drilling services companies and many smaller, regional competitors. Some of the Company's competitors have been in the drilling services industry for a longer period and have substantially greater financial and other resources than the Company has. Increased competition in the drilling services market may adversely affect the Company's current market share, profitability and growth opportunities. The capital cost to acquire drilling rigs is relatively low, enabling competitors to finance expansion and providing opportunity for new competitors to enter the market. This dynamic exposes the Company to the risk of reduced market share and scope for geographic growth, as well as lower revenue and margin for its existing business.

A significant portion of the drilling services business is a result of being awarded contracts through a competitive tender process. It is possible that the Company will lose potential new contracts to competitors if it is unable to demonstrate reliable performance, technical competence and competitive pricing as part of the tender process or if mining companies elect not to undertake a competitive tender process.

Inability to Sustain and Manage Growth

The Company's ability to grow will depend on a number of factors, many of which are beyond the Company's control, including, but not limited to, commodity prices, the ability of mining companies to raise financing and the demand for

raw materials from large, emerging economies such as the Brazil, Russia, India and China ("BRIC") economies. In addition, the Company is subject to a variety of business risks generally associated with growing companies. Future growth and expansion could place significant strain on the Company's Management personnel and likely will require the Company to recruit additional management personnel.

There can be no assurance that the Company will be able to: i) manage its expanding operations (including any acquisitions) effectively; ii) sustain or accelerate its growth or that such growth, if achieved, will result in profitable operations; iii) attract and retain sufficient management personnel necessary for continued growth; or, iv) successfully make strategic investments or acquisitions. The failure to accomplish any of the foregoing could have a material adverse effect on the Company's financial performance, financial condition, cash flows and growth prospects.

Future Acquisition Strategy

The Company intends to grow through acquisitions in addition to organic growth. There is considerable competition within the drilling services industry for attractive acquisition targets. It is not possible to ensure that future acquisition opportunities will exist on acceptable terms, or that newly acquired or developed entities will be successfully integrated into the Company's operations. Additionally, the Company cannot give assurances that it will be able to secure the adequate financing on acceptable terms to pursue this strategy.

Customer Contracts

The Company's surface drilling customer contracts are typically for a term of six (6) to twelve (12) months and its underground drilling customer contracts are typically for a term of one to two years and can be cancelled by the customer on short notice in prescribed circumstances with limited or no amounts payable to the Company. There is a risk that existing contracts may not be renewed or replaced. The failure to renew or replace some or all of these existing contracts and cancellation of existing contracts could have a material adverse effect on the Company's financial performance, financial condition, cash flows and growth prospects. In addition, consolidation by the Company's customers could materially and adversely affect the Company's results of operations and financial condition.

International Expansion and Instability

Expansion internationally entails additional political and economic risk. Some of the countries and areas targeted by the Company for expansion are undergoing industrialization and urbanization and do not have the economic, political or social stability that many developed nations now possess. Other countries have experienced political or economic instability in the past and may be subject to risks beyond the Company's control, such as war or civil disturbances, political, social and economic instability, corruption, nationalization, terrorism, expropriation without fair compensation or cancellation of contract rights, significant changes in government policies, breakdown of the rule of law and regulations and new tariffs, taxes and other barriers. There is a risk that the Company's operations, assets, employees or repatriation of revenue could be impaired or adversely affected by factors related to the Company's international expansion and have a material adverse effect on the financial performance, financial condition, cash flow and growth prospects of the Company.

Operational Risks and Liability

Risks associated with drilling include, in the case of employees, personal injury and loss of life and, in the case of the Company, damage and destruction to property, equipment, release of hazardous substances to the environment and interruption or suspension of drill site operation due to unsafe drill operations. The occurrence of any of these events may have an adverse effect on the Company, including financial loss, key personnel loss, legal proceedings and damage to the Company's reputation.

In addition, poor or failed internal processes, people or systems, along with external events could negatively impact the Company's operational and financial performance. The risk of this loss, known as operational risk, is present in all aspects of the business of the Company, including, but not limited to, business disruptions, technology failures, theft and fraud, damage to assets, employee safety, regulatory compliance issues or business integration issues. The

number and significance of the changes and the possibility that the Company may not be able to successfully implement the changes made, may adversely affect the performance of the business and its financial condition, cash flows and growth prospects of the Company.

Currency Exposure

Orbit Garant conducts some of its activities in US dollars and in Chilean Pesos and is thus exposed to foreign exchange fluctuations. As at June 30, 2017, we had US dollar and Chilean Pesos revenue exposures of approximately $5.8 and $20.2 million respectively. This exposure could change in the future and a significant portion of our revenue could potentially be denominated in currencies other than the Canadian dollar, fluctuations of which could cause a negative impact on our financial performance.

Business Interruptions

Business interruptions can occur as a result of a variety of factors, including; regulatory intervention, delays in necessary approvals and permits, health and safety issues or product input supply bottlenecks. In addition, the Company operates in a variety of geographic locations, some of which are prone to inclement weather conditions, natural or other disasters. The occurrence of such conditions or any business interruption could have a material adverse effect on the Company's financial performance, financial condition, cash flows and growth prospects.

Risk to the Company's Reputation

Risks to the Company's reputation could include any negative publicity, whether true or not, and could cause a decline in the Company's customer base and have a material adverse impact on the Company's financial performance, financial condition, cash flows and growth prospects. All risks have an impact on reputation, and as such, reputational risk cannot be managed in isolation from other types of risk. Every employee and representative of the Company is charged with upholding its strong reputation by complying with all applicable policies, legislation and regulations as well as creating positive experiences with the Company's customers, stakeholders and the public.

Environment, Health and Safety Requirements and Related Considerations

The Company's operations are subject to a broad range of federal, provincial, state and local laws and regulations as well as permits and other approvals, including those relating to the protection of the environment and workers' health and safety governing, among other things, air emissions, water discharges, non-hazardous and hazardous waste (including waste water), storage, handling, disposal and clean-up of dangerous goods and hazardous materials such as chemicals, remediation of releases and workers' health and safety in Canada and elsewhere (the ''Environment, Health and Safety Requirements''). As a result of the Company's operations, it may be involved from time to time in administrative and judicial proceedings and inquiries relating to Environment, Health and Safety Requirements. Future proceedings or inquiries could have a material adverse effect on the Company's business, financial condition and results of operations.

The activities at clients' worksites may involve operating hazards that can result in personal injury and loss of life. There can be no assurance that the Company's insurance will be sufficient or effective under all circumstances or against all claims or hazards to which it may be subject or that it will be able to continue to obtain adequate insurance protection. A successful claim or damage resulting from a hazard for which it is not fully insured could adversely affect the Company's results of operations. In addition, if the Company is seen not to adequately implement health and safety and environmental policies, its relationships with its customers may deteriorate, which may result in the loss of contracts and restrict its ability to obtain new contracts.

Insurance Limits

The Company maintains property, general liability and business interruption insurance. However, there can be no assurance that such insurance will continue to be offered on an economically feasible basis, that all events that could

give rise to a loss or liability are insurable, or that the amounts of insurance will at all times be sufficient to cover each and every loss or claim that may occur involving the assets or operations of the Company.

Legislative and Regulatory Changes

Changes to any of the laws, rules, regulations or policies affecting the business of the Company would have an impact on the Company's business and may significantly and adversely affect the operations and financial performance of the Company.

Legal and Regulatory Risk

The mining and drilling industries are highly regulated by legal, environmental and health and safety regulations. Failure to comply with such regulations could lead to penalties, including fines or suspension of operations which could have a significant impact on the financial strength and future earnings potential of the Company. Furthermore, the Company's mineral exploration customers are also subject to similar legal, regulatory, health and safety regulations which could materially affect their decision to go ahead with mineral exploration or mine development and thereby indirectly negatively impact the Company.

Risk Related to Structure and Common Shares

Equity Market Risks

There is a risk associated with any investment in shares. The market price of securities such as the Common Shares of the Company are affected by numerous factors including, but not limited to, general market conditions, actual or anticipated fluctuations in the Company's results of operations, changes in estimates of future results of operations by the Company or securities analysts, risks identified in this section and other factors. In addition, the financial markets have experienced significant price and volume fluctuations that have sometimes been unrelated to the operating performance of the issuers or the industries in which they operate. Consequently, the trading price of the Common Shares may fluctuate.

Influence of Existing Shareholders

As of September 6, 2017, Pierre Alexandre, Vice Chairman and Vice President of Corporate Development of the Company, holds or controls, directly or indirectly, approximately 26% of Orbit Garant's outstanding Common Shares. As a result, this shareholder has the ability to influence Orbit Garant's strategic direction and policies, including any merger, consolidation or sale of all or substantially all of its assets, and the election and composition of Orbit Garant's Board of Directors. The foregoing ability to affect the control and direction of Orbit Garant could reduce its attractiveness as a target for potential takeover bids and business combinations, and correspondingly affect its share price.

Future Sales of Common Shares by the Company's Existing Shareholders

Certain shareholders, including Pierre Alexandre, hold or control significant blocks of shares of the Company. The decision of any of these shareholders to sell a substantial number of Common Shares in the public market could result in a material imbalance in demand for the Company's shares and therefore a decline in the market price of the Common Shares. In addition, the perception among the public that such sales may occur could also result in a reduction in the market price of the Common Shares.

Dilution

Orbit Garant may raise additional funds in the future by issuing equity securities. Holders of Common Shares will have no pre-emptive rights in connection with such further issuances. Additional Common Shares may be issued by Orbit Garant in connection with the exercise of options granted. Such additional equity issuances could, depending on the price at which such securities are issued, substantially dilute the interests of the holders of Common Shares.

Dividend Payments

Orbit Garant does not expect to pay dividends as it intends to use cash for future growth or debt repayment. In addition, the Credit Agreement places restrictions on the ability of Orbit Garant to declare or pay dividends.

Credit Risk

The Company provides credit to its customers in the normal course of its operations. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. It carries out, on a continuing basis, credit checks on its customers and maintains provisions for contingent credit losses. Demand for the Company's drilling services depends upon the level of mineral exploration and development activities conducted by mining companies, particularly with respect to gold, nickel and copper.

In order to reduce the credit risk, the Company is using insurance coverage from Export Development Canada («EDC») on certain accounts receivable from its customers. The insurance program provides under certain terms and conditions an insurance coverage amount of up to 90% of unpaid accounts. As at June 30, 2017, the amount of the insurance coverage from EDC represents 5% of the accounts receivable (7% as at June 30, 2016).

As at June 30, 2017, 58% (53% as at June 30, 2016) of the trade accounts receivable are aged as current and 5% are impaired (5% as at June 30, 2016).

Two major customers represent 25% of the trade accounts receivable as at June 30, 2017 (June 30, 2016, one major customer represented 10% of these accounts).

Two major customers represent 29% of the contract revenue for the year ended June 30, 2017 (year ended June 30, 2016, two major customers represent 39%).

Credit risk also arises from cash and cash equivalents with banks and financial institutions. This risk is limited because the counterparties are mainly Canadian banks with high credit ratings. The Company does not enter into derivatives to manage credit risk.

Interest Rate Risk

The Company is subject to interest rate risk since a significant part of the long-term debt bears interest at variable rates.

As at June 30, 2017, the Company has estimated that a one percentage point increase or decrease in interest rates would have caused a corresponding annual increase or decrease in net loss of $0.1 million ($0.1 million impact in 2016).

Equity Market Risk

Equity market risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors the general trends in the stock markets and individual equity movements, and determines the appropriate course of actions to be taken by the Company.

Fair Value

The fair value of cash, trade and other receivable, trade and other payable and accrued liabilities, and factoring liabilities is approximately equal to their carrying values due to their short-term maturity.

The fair value of long-term debt approximates its carrying value as it bears interest at a variable rate and has financing conditions similar to those currently available to the Company.

The fair value of loan receivable approximates its carrying value as the interest rate was established based on market conditions and the interest rates on the market have not changed significantly since the loan was granted.

OUTLOOK

The recovery in the mining sector began in early 2016 and has continued in 2017. The recovery began after three years of difficult market conditions in which metal prices declined. Metal prices and mining equity valuations are significantly higher today than they were at the start of 2016. As a result, investor interest in the sector has increased and a greater number of mining companies have been able to access capital. Miners listed on the TSX and TSX-Venture Exchanges completed 705 financings in the first six months of 2017, and a total of 2,245 financings between the start of 2016 and June 30, 2017, data from TMX Group shows. This compares to just 1,123 mining financings on the TSX and TSX-Venture Exchanges in 2015. Accordingly, a greater number of mining companies have stronger capital positions and are increasing their exploration and mine development budgets.

As a result of improving mining industry conditions, demand for drilling services has rebounded. Drill utilization rates began to increase in late 2016 and have improved significantly in 2017. This is reducing the current oversupply of mineral drilling services capacity in the market. Global drilling prices remain competitive, but have largely stabilized, and Management is now seeing opportunities to increase pricing on new contracts. Price increases typically occur after a rebound in utilization rates. Management is encouraged by the recent positive developments and believes that they could continue to have a positive impact on operations in the months ahead as senior and intermediate mining companies look to replenish depleting reserves and junior exploration companies strive to identify or further delineate new mineral deposits. An additional positive factor for mining companies operating in Canada is the current lower value of the Canadian dollar relative to the US dollar, as their expenses are typically in Canadian dollars and their revenues are denominated in US dollars. At the time of this report, the value of the Canadian dollar was approximately 0.82 US dollars. While the Canadian dollar has increased since May 2017, it remains well below the trading range seen as recently as 2014.

Management believes the long-term outlook for the mining industry is positive and is encouraged by the Company's recent increase in business activity in Canada and internationally. Management remains focused on maximizing stakeholder value principally by controlling costs, optimizing drill rig utilization, increasing productivity rates, continuing to focus on technology innovation, retaining key personnel, maintaining strong health and safety standards, and evaluating opportunities to further expand Orbit Garant's market presence both in Canada and abroad. The Company expects to increase profitability from higher utilization rates, improved productivity and price increases on new contracts in fiscal 2018.

Management believes the Company's proprietary computerized monitoring and control drilling technology will increasingly be an important contributor in reducing both labour and consumable drilling costs, enhancing driller productivity rates and improving safety. Orbit Garant currently has 32 drill rigs featuring its computerized monitoring and control technology, all of which are currently deployed on customer projects. To date, these next generation drill rigs have achieved a significant increase in productivity compared to that achieved using conventional drill rigs. Orbit Garant's customers have responded positively to the improved performance and potential of the new drill rigs, which has led to renewals of underground drilling contracts for longer terms.

Orbit Garant's growth strategy is focused on capturing increased market share in Canada and expanding its international market presence. Orbit Garant's 10 consecutive quarters of year-over-year growth in revenue reflects the Company's recent success in securing new contracts and extending existing contracts in Canada. In terms of international market presence, Orbit Garant has established operating subsidiaries in Chile, Ghana, Guyana and Peru, and recently opened a new operating subsidiary in Burkina Faso. In South America, Orbit Garant is currently working on projects in Chile and Guyana is actively pursuing new opportunities to grow its South American business. The

Company's acquisition of OG Chile has significantly enhanced its platform for growth in Chile and throughout South America. In Africa, the Company is currently working on projects in Burkina Faso and Ghana. The Company is currently in the process of closing its operating subsidiary in Kazakhstan.

Orbit Garant will continue to monitor market conditions closely and manage its staff and inventory levels, capital expenditures and balance sheet accordingly. With its sound balance sheet, the Company remains committed to pursuing value-enhancing growth opportunities in Canada and internationally.

DISCLOSURE CONTROLS AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

The CEO and the CFO of the Company are responsible for establishing and maintaining disclosure controls and procedures (DC&P) for the Company as defined under Multilateral Instrument 52-109 issued by the Canadian Securities Administrators. The CEO and the CFO have designed such DC&P, or caused them to be designed under its supervision, to provide reasonable assurance that information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time periods specified in the securities legislation and include controls and procedures designed to ensure that information required to be disclosed by an issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is accumulated and communicated to the Company's management, including its certifying officers, as appropriate to allow timely decisions regarding required disclosure.

As at June 30, 2017, the CEO and CFO evaluated the design and operation of the Company's DC&P. Based on that evaluation, the CEO and CFO concluded that the Company's DC&P was effective as at June 30, 2017.

The CEO and the CFO are responsible for designing internal controls over financial reporting ("ICFR") or causing them to be designed under their supervision. The Company's ICFR are designed to provide reasonable assurance regarding the reliability of the Company's financial reporting and its preparation of financial statements for external purposes in accordance with IFRS.

As discussed above, the inherent limitations in all control systems are such that they can provide only reasonable, not absolute, assurance that all control issues and instances of fraud or error, if any, within the Company, have been detected. Therefore, no matter how well designed, ICFR have inherent limitations and can provide only reasonable assurance with respect to financial statement preparation and may not prevent and detect all misstatements.

During Fiscal 2017, Management, including its CEO and CFO, evaluated the existence and design of the Company's ICFR and confirm there were no changes to the ICFR that have occurred during the year which materially affected, or are reasonably likely to materially affect, the Company's ICFR. The Company continues to review and document its disclosure controls and its ICFR, and may, from time to time make changes aimed at enhancing their effectiveness and to ensure that its systems evolve with the business. As of June 30, 2017, an evaluation was carried out, under the supervision of the CEO and CFO, of the effectiveness of the Company's ICFR as defined in NI 52-109. Based on this evaluation, the CEO and the CFO concluded that the design and operation of these ICFR were effective.

The evaluations were conducted in accordance with the framework and criteria established in Internal Control – Integrated Framework (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), a recognized control model, and the requirements of NI 52-109.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying audited consolidated financial statements («financial statements») of Orbit Garant Drilling Inc. (the «Company») and all the information in this annual report are the responsibility of the management of the Company and are approved by the Board of Directors.

The financial statements have been prepared by management in accordance with International Financial Reporting Standards and, where appropriate, include management's best estimates and judgments. Management has reviewed the financial information presented throughout this report and has ensured that it is consistent with the financial statements.

Management are responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting to provide reasonable assurance that transactions are authorized, assets are safeguarded and the integrity and fairness of the financial information is ensured as at June 30, 2017. Based on this evaluation, Management has concluded that the Company's internal control over financial reporting as at June 30,2017, was effective to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of its financial statements for external purposes in accordance with applicable accounting principles.

The Board of Directors of the Company is responsible for ensuring that Management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the financial statements. The Board of Directors carries out this responsibility principally through the Audit Committee. The Board of Directors appoints the Audit Committee, and all of its members are independent directors. The Audit Committee meets periodically with management and independent auditors to review internal controls, audit results and accounting principles. Acting on the recommendation of the Audit Committee, the financial statements are forwarded to the Board of Directors of the Company for its approval.

The financial statements have been audited, on behalf of the shareholders, by KPMG LLP for the year ended June 30, 2017 and by Deloitte LLP for the year ended June 30, 2016, the independent auditors, in accordance with Canadian generally accepted auditing standards. The independent auditors have full and free access to the Audit Committee and may meet with or without the presence of management.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Orbit Garant Drilling Inc.

We have audited the accompanying consolidated financial statements of Orbit Garant Drilling Inc. (the "entity"), which comprise the consolidated statement of financial position as at June 30, 2017, the consolidated statement of loss and comprehensive loss, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Orbit Garant Drilling Inc. as at June 30, 2017, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

Comparative Information

The consolidated financial statements of Orbit Garant Drilling Inc., as at and for the year ended June 30, 2016, were audited by another auditor who expressed an unmodified opinion on those consolidated financial statements on September 15, 2016.

1. DESCRIPTION OF BUSINESS

Orbit Garant Drilling Inc. (the "Company"), amalgamated under the *Canada Business Company Act* , mainly operates a surface and underground diamond drilling business. The Company has operations in Canada, United States, Central and South America, West Africa and Kazakhstan.

The Company's head office is located at 3200, boul. Jean-Jacques Cossette, Val-d'Or (Québec), Canada. The Company holds interests in several entities. The percentage of voting rights in its subsidiaries and its associates is as follows:

	% of voting rights
Orbit Garant Drilling Services Inc.	100%
9116-9300 Québec inc.	100%
Drift Exploration Drilling Inc.	100%
Drift de Mexico SA de CV	100%
Lantech Drilling Services Inc. (wound up into Orbit Garant Drilling Inc. as of June 30, 2017)	100%
Orbit Garant Chile S.A.	100%
Perforación Orbit Garant Chile SpA	100%
Cygnus-Orbit Drilling SpA (wound up into Perforación Orbit Garant Chile SpA as of December 31, 2016)	100%
Orbit Garant Drilling Ghana Limited	100%
Perforación Orbit Garant Peru S.A.C.	100%
OGD Drilling (Guyana) Inc. (since August 16, 2016)	100%
Forage Orbit Garant BF S.A.S. (since October 24, 2016)	100%
Orbit Miyuu Kaa Drilling Inc. (since February 15, 2017)	49%
Sarliaq-Orbit Garant Inc. (since October 3 , 2016)	49%

2. BUSINESS ACQUISITION

Acquisition of Captagua Ingeniería S.A. (Orbit Garant Chile S.A.):

On December 30, 2015, the Company acquired all issued and outstanding shares of Captagua Ingeniería S.A., which provides an expertise in drilling and a presence in Chile, a major mining jurisdiction. This acquisition is expected to enhance the Company's platform for future growth in Chile and throughout South America. Captagua Ingeniería S.A. has an experienced management team, highly skilled personnel and a strong reputation in the Chilean market. The consideration transferred for the transaction was a total net consideration of $1,718 through the issuance of 1,824,900 common shares of the Company valued at a price of $0.70 per share at the acquisition date and an adjustment of an amount of $441 to be paid when the acquired company will receive the reimbursement of income tax receivable. The total assets acquired totaled an amount of $15,129 and the total liabilities assumed totalled an approximate amount of $8,391. The amount of goodwill will not be taxable for income tax purposes.

The results of operations of Captagua Ingeniería S.A. are included in the consolidated financial statements from December 30, 2015.

On August 16, 2016, the Company changed the legal corporate name of Captagua Ingeniería S.A. to Orbit Garant Chile S.A.

2. BUSINESS ACQUISITION (continued)

The purchase price of that above transaction was allocated to the net assets acquired on the basis of their fair values as follows:

Business acquisition date:	Captagua Ingeniería S.A. (December 30, 2015)
	$
Cash	189
Trade and other receivables	5,673
Inventories	1,790
Income taxes receivable	441
Other current assets	34
Property, plant and equipment	7,002
Trade and other payables	(2,889)
Factoring liabilities	(3,269)
Finance leases	(2,233)
Negative goodwill recorded to earnings	(5,020)
Consideration transferred	1,718

Consideration transferred	
Issuance of common shares	1,277
Account payable related to income taxes recovered	441
	1,718

Business acquisition costs

For the year ended June 30, 2016, business acquisition costs of $781 related to the transaction described above were included in the general and administrative expenses in the consolidated statement of loss.

Impact of business acquisition on results

From the date of acquisition until June 30, 2016, revenues and net loss from this business acquisition amounted to $6,216 and $2,281, respectively.

3. BASIS OF PREPARATION

Basis of presentation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standard Board ("IASB"). The IFRS accounting policies set out below were consistently applied to all periods presented.

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates, assumptions and judgements. It also requires Management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant are disclosed in Note 5.

These consolidated financial statements have been prepared on a historical cost basis, except for the investments, which have been measured at fair value of the indentifiable assets and liabilities of the business acquired and share-based compensation. They are presented in Canadian dollars, which is the currency of the primary economic environment in which the Company operates («functional currency»). All values are rounded to the nearest thousand dollars, except where otherwise indicated.

These consolidated financial statements were approved for issue by the Board of Directors of Orbit Garant Drilling Inc. on September 6, 2017.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company. A subsidiary is an entity controlled by the Company. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee, independently of its percentage of participation. The existence and effect of potential voting rights are considered when the Company controls another entity.

Income and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated statement of loss from the effective date of acquisition to the effective date of disposal, as appropriate. Intercompany transactions and balances are eliminated on consolidation.

Business combinations

Business combinations are accounted for using the acquisition method. The consideration transferred in a business combination is measured at the fair value which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Company, liabilities incurred by the Company with the former owners of the acquiree and the equity interests issued by the Company in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred. This consideration can be comprised of cash, assets transferred, financial instruments issued, liabilities assumed by the Company to the former owner, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at fair value at the acquisition date.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Results of operations of a business acquired are included in the Company's consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred. Non-controlling interests in an entity acquired are presented in the consolidated statement of financial position within equity, separately from the equity attributable to shareholders in the «Equity» section of the consolidated statement of financial position. Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net value of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net value of the acquisition-date amounts of identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held securities in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Foreign currency translation

Transactions denominated in a currency other than the functional currency of the Company or of a foreign subsidiary whose functional currency is the Canadian dollar, are accounted for using the exchange rate prevailing on the transaction date. On each reporting date, monetary items denominated in a foreign currency are translated using the exchange rate prevailing on that date, and non-monetary items that are measured at historical cost are not adjusted. Exchange differences are recognized in net earnings in the period during which they occur.

The assets and liabilities of foreign subsidiaries whose functional currency is not the Canadian dollar are translated into Canadian dollars by applying the exchange rate prevailing as at the reporting date. Revenue and expense items are translated at the average exchange rate for the period. Exchange differences are recognized in OCI under "Cumulative translation differences" and are accumulated in equity. The accumulated amount of exchange differences is reclassified in net earnings upon disposal or partial disposal of an interest in a foreign operation.

Financial instruments

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose for which the financial instruments were acquired or issued, their characteristics and the Company's designation of such instruments. Financial instruments are recognised when, the Company becomes a party to the contractual provisions of the instrument.

Asset/Liability	Classification	Measurement
Cash	Loans and receivables	Amortized cost
Trade and other receivables	Loans and receivables	Amortized cost
Investments	Available-for-sale	Fair value
Loan receivable	Loans and receivables	Amortized cost
Trade and other payables	Other liabilities	Amortized cost
Factoring liabilities	Other liabilities	Amortized cost
Long-term debt	Other liabilities	Amortized cost

Amortized cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a financial instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash flows (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Employee Benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees or for the termination of employment. Wages, paid leaves, bonuses and non-monetary benefits are short-term employee benefits, and they are recorded in the annual reporting period in which the employees of the Company render the related services.

Trade and other receivables

Trade and other receivables are initially stated at their fair value, less an allowance for doubtful accounts. The Company establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. Individual trade receivables are written off when Management deems them not collectible. The carrying amounts for trade receivables are net of allowances for doubtful accounts, which are estimated based on aging analysis of receivables, past experience, specific risks associated with the customer and other relevant information.

Cash and cash equivalents

Cash and cash equivalents include cash and bank overdraft of which the balance often fluctuates between the available cash amount and the indebtedness.

Inventories

The Company maintains an inventory of operating supplies, motors, drill rods and drill bits. These inventories are valued at the lower of cost and net realizable value. Net realizable value is determined using the estimate selling price of projets less estimated costs to complete the project. Cost is determined on the first-in, first-out basis. Used and revised inventories are valued at 50% and 75% of cost respectively. The amount of any depreciation of inventories can be reversed when the circumstances that led to the write-down charge in the past no longer exists.

Investments

Investments in publicly traded securities are classified as available-for-sale. Available-for-sale investments are recorded at fair value, with unrealized gains or losses recorded in other comprehensive loss. Realized gains or losses are recorded in the consolidated statement of loss when the investment is sold.

If the fair value of an investment declines below the carrying amount, the Company undertakes an assessment of whether the impairment is significant or prolonged. When a decline in the fair value of an available-for-sale investment has been recognized in other comprehensive loss and there is objective evidence that the investment is impaired, any cumulative loss that has been recognized in other comprehensive loss is reclassified as an impairment loss in the consolidated statement of loss.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Cost represents the acquisition costs, net of government grants and investment tax credits, or manufacturing costs, including preparation, installation and testing costs. The manufacturing costs for drilling equipment include the material, direct labour and indirect specific costs.

Borrowing costs are also included in the cost of self-constructed property, plant and equipment. Future expenditures, such as maintenance and repairs, are expensed as incurred.

Significant improvements are capitalized and amortized over the useful life of the asset.

Property, plant and equipment are recorded at cost and depreciation is calculated using the straight-line method based on their estimated useful life using the following periods:

	Useful life	Residual value
Buildings and components	5 to 40 years	-
Drilling equipment	5 to 10 years	0 - 20 %
Vehicles	5 years	-
Other	3 to 10 years	-

The depreciation begins when the property, plant and equipment are ready for their intended use. Land is not depreciated.

Intangible assets

Intangible assets are accounted for at cost less accumulated depreciation and accumulated impairment losses. Amortization is based on their estimated useful life using the straight-line method and the following period:

Drilling technology	5 years

Amortization methods, residual values and the useful lives of significant intangible assets are reviewed at each financial year-end. Any change is accounted for prospectively as an accounting estimate change.

Impairment of non-financial assets

For the purposes of assessing impairment, assets are grouped in cash-generating units («CGU»), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Company reviews, at the end of each reporting period, whether events or circumstances have occurred to indicate that the carrying amounts of its non-financial assets with finite useful lives may be less than their recoverable amounts.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment on June 30 of each financial year or whenever there is an indication that the carrying amount of the asset, of the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value, less costs of disposal, and the value in use of the asset or the CGU. Fair value, less costs of disposal, represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for non-financial assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of loss to the extent that the carrying amount at the date that the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognised.

Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the reporting date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in earnings in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized in other comprehensive earnings or otherwise directly in equity to the extent that it relates to items that are recognized in other comprehensive loss or directly in equity in the same or a different period.

In the course of the Company's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and due to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Company recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Leases

Property, plant and equipment held under a finance lease is initially recognized at the lesser of the fair value of the asset and the present value of the minimum lease payments. The leased item is then recognized in the same manner as other similar assets held by the Company. The related liability payable to the lessor is recorded as a debt resulting from a finance lease and a finance charge is recognized in net earnings for the duration of the lease.

Operating lease payments are recognized in the consolidated statement of loss on a straight-line basis over the period of the lease. Any lessee incentives are amortized as a reduction lease expense.

Revenue recognition

Revenue from drilling contracts is recognized on the basis of actual metres drilled for each contract. Revenue from ancillary services is recorded when the service is rendered and revenue from the sale of drilling rigs is recorded at shipping. The Company recognizes revenue when persuasive evidence of an arrangement exists, service has been rendered, merchandise has been shipped, the price to the buyer is fixed or determinable and collection is reasonably assured.

Earnings per share

Earnings per share are calculated using the weighted average number of shares outstanding during the year.

Diluted earnings per share are determined as net earnings, divided by the weighted average number of diluted common shares outstanding for the period. Diluted common shares reflect the potential dilutive effect of exercising the share options based on the treasury share method.

Share options

The Company uses the fair value method to account for share options. In accordance with this method, compensation cost is measured at the fair value of the option at the grant date using the Black-Scholes option pricing model and is amortized to earnings over the vesting period. The fair value is recognized as an expense with a corresponding increase in equity settled reserve. The amount recognized as an expense is adjusted to reflect the number of share options expected to vest and is net of share options cancelled prior to being vested. When unexercised share options are forfeited or expired, the amounts are transferred to retained earnings.

5. CRITICAL ACCOUNTING ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

The preparation of financial statements in accordance with IFRS requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and contingent liabilities on the reporting date, and amounts of revenues and expenses for the relevant period. Although management regularly reviews its estimates, actual results may differ. The impact of changes to accounting estimates is recognized in the period during which the change occurs, and in the affected future periods, when applicable. Areas in which the estimates and assumptions are significant or which are complex, are presented as follows:

Inventories

Inventory is measured at the lower of cost and net realizable value. In estimating net realizable values, Management takes into account the most reliable evidence available at the time the estimates are made. Net realizable value is determined using the estimated selling price of projects less estimated costs to complete the project. Used and revised inventories are valued at 50% and 75% of cost respectively. The amount of the depreciation of inventories can be reversed when the circumstances that led to the impairment charge in the past no longer exists.

Useful lives of depreciable assets

Depreciation methods, residual values and useful lives of property, plant and equipment are reviewed at each reporting date by Management. Any change is accounted for prospectively as a change in accounting estimate. As at June 30, 2017, Management assesses that the useful lives represent the period of expected use of the assets of the Company.

Business combinations

On initial recognition, the assets and liabilities of the acquired business are included in the consolidated statement of financial position of the Company at their fair values. In measuring fair value, Management uses estimates about future cash flows and discount rates, however, the actual results may vary.

Income taxes

The Company is subject to income taxes in various jurisdictions. Judgement is required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due in the future. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax assets

The assessment of the probability in which deferred tax assets can be utilized is based on the Company’s latest approved budget forecast, which is adjusted for significant non-taxable income (and expenses) and specific limits to the use of any unused tax loss or credit. The tax rules in the numerous jurisdictions in which the Company operates are also carefully taken into consideration. If a forecast of taxable income indicates the probable use of a deferred tax asset, especially when it can be utilized without a time limit, that deferred tax asset is usually recognized in full. The recognition of deferred tax assets that are subject to certain legal or economic limits or uncertainties is assessed individually by Management based on specific facts and circumstances.

5. CRITICAL ACCOUNTING ESTIMATES, ASSUMPTIONS AND JUDGEMENTS (continued)

Provisions

Provisions are recognized when (i) the Company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated.

Provisions are reviewed at each reporting date and changes in estimates are reflected in the consolidated statement of loss in the reporting period in which changes occur.

Share options

The Company uses the fair value method to account for share options. In accordance with this method, compensation cost is measured at the fair value of the option at the grant date using the Black-Scholes option pricing model which is based on assumptions such as volatility, dividend yield and expected term.

The preparation of financial statements according to the IFRS also requires management to make judgments, other than those involving estimates, in the process of applying of the Company's accounting policies. Areas in which judgements are significant are as follow:

Functional currency

In determining the functional currency of its foreign subsidiaries, the Company needs to evaluate different factors such as the currency that mainly influences sales prices and costs, the economic environment and the degree of autonomy of the subsidiary. Following the evaluation of the different factors, when the functional currency is not obvious, the Company uses its judgment to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

Impairment of non-financial assets

The Company also uses its judgement to determine whether an impairment test must be performed due to the presence of potential impairment indicators. In applying its judgement, the Company relies primarily on its knowledge of its business and the economic environment. As at June 30, 2017 and as at June 30, 2016, the Company concluded that there was no impairment indicators, and it did not perform an impairment test (see Notes 11 and 12).

6. STANDARDS AND INTERPRETATIONS ADOPTED

The following standards and amendments to existing standards have been adopted by the Company on July 1, 2016:

IAS 16 – Property, Plant and Equipment
IAS 16 prohibits entities from using a revenue-based depreciation method for items of property, plant and equipment.

IAS 38 – Intangible Assets
IAS 38 introduces a rebuttable presumption that revenue is not an appropriate basis for amortization of an intangible asset, except in two limited circumstances.

6. STANDARDS AND INTERPRETATIONS ADOPTED (continued)

IFRS 10 – Consolidated Financial Statements and IAS 28 – Investments in Associates and Joint Ventures

The amendment entitled *"Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"* specifies the treatment to be adopted when an entity sells or contributes assets that constitute a business to a joint venture or an associate or loses control of a subsidiary that contains a business but it retains joint control or significant influence, the gain or loss resulting from that transaction is recognized in full. When an entity sells or contributes assets that do not constitute a business to a joint venture or associate or loses control of a subsidiary that does not contain a business but it retains joint control or significant influence in a transaction involving an associate or a joint venture, the gain or loss resulting from that transaction is recognized only to the extent of the unrelated investors' interest in the joint venture or associate, the entity's share of the gain or loss is eliminated.

IAS 1 – Presentation of Financial Statements

The amendment entitled "*Disclosure Initiative*" comprises several narrow-scope amendments to improve presentation and disclosure requirements in existing standards.

Annual improvements to IFRS (2012-2014 Cycle), which include among others:

Amendments to IFRS 5, *Non-Current Assets Held for Sale and Discontinued Operations*, introduce guidance for when an entity reclassifies an asset (or disposal group) from held-for-sale to held-for-distribution to owners (or vice versa), or when held-for-distribution accounting is discontinued.

Amendments to IFRS 7, *Financial Instruments: Disclosure*, provide additional guidance to clarify whether a servicing contract constitutes continuing involvement in a transferred asset for the purposes of the disclosures required in relation to transferred assets, and guidance as to whether the disclosure requirements on offsetting financial assets and financial liabilities should be included in consolidated financial statements.

Amendments to IAS 34, *Interim Financial Reporting*, clarify the requirements relating to information required by IAS 34 that is presented elsewhere within the interim financial report but outside of the interim financial statements. The amendments require that such information be incorporated by cross-reference from the interim condensed consolidated financial statements to the other part of the interim condensed consolidated financial report that is available to users on the same terms and at the same time as the interim condensed consolidated financial statements.

The standards and amendments listed above did not have any impact on the Company's consolidated financial statements.

7. RECENT ACCOUNTING PRONOUNCEMENT

New standards and interpretations not yet adopted:

IFRS 9 – Financial Instruments

IFRS 9 (2014) introduces new requirements for the classification and measurement of financial assets. Under IFRS 9 (2014), financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. The standard introduces additional changes relating to financial liabilities. It also amends the impairment model by introducing a new ‘expected credit loss’ model for calculating impairment. The mandatory effective date of IFRS 9 is for annual periods beginning on or after January 1, 2018 and must be applied retrospectively with some exemptions. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

7. RECENT ACCOUNTING PRONOUNCEMENT (continued)

IFRS 15 – Revenue from Contracts with Customers

The standard contains a single model that applies to contracts with customers and two approaches to recognising revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. The new standard applies to contracts with customers. It does not apply to insurance contracts, financial instruments or lease contracts, which fall in the scope of other IFRSs. The new standard is effective for annual periods beginning on or after January 1, 2018. Earlier application is permitted. IFRS 15 will replace IAS 11 *Construction Contracts*, IAS 18 *Revenue*, IFRIC 13 *Customer Loyalty Programmes*, IFRIC 15 *Agreements for the Construction of Real Estate*, IFRIC 18 *Transfer of Assets from Customers*, and SIC 31 *Revenue – Barter Transactions Involving Advertising Services*. The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

IAS 7 – Statement of Cash Flows

The amendment entitled "*Disclosure initiative - Reconciliation of liabilities from financing activities*" comprises amendments to provide investors with improved disclosures about an entity's debt and movements in debt during the reporting period and its liquidity. The amendments to IAS 7 are effective from years beginning January 1, 2017 without need to provide comparative information when they first apply the amendments, with early adoption permitted. To satisfy the new disclosure requirements, the Company intends to present a reconciliation between the opening and closing balance for liabilities arising from financing activities.

IFRS 16 – Leases

This standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. This standard substantially carries forward the lessor accounting requirements of IAS 17, while requiring enhanced disclosures to be provided by lessors. The new standard is effective for annual periods beginning on or after January 1, 2019. Earlier application is permitted for entities that apply IFRS 15 *Revenue from Contracts with Customers* at or before the date of initial adoption of IFRS 16. IFRS 16 will replace IAS 17 *Leases*. The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

Recognition of Deferred Tax Assets for Unrealized Losses (Amendments to IAS 12)

The amendments clarify that the existence of a deductible temporary difference depends solely on a comparison of the carrying amount of an asset and its tax base at the end of the reporting period, and is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset. The amendments also clarify the methodology to determine the future taxable profits used for assessing the utilization of deductible temporary differences. The amendments apply retrospectively for annual periods beginning on or after January 1, 2017. Earlier application is permitted. The Company is assesing the potential impact on its consolidated financial statements resulting from the amendments. So far, the Company does not expect any significant impact.

Classification and Measurement of Share-based Payment Transactions (Amendments to IFRS 2)

The amendments provide requirements on the accounting for (i) the effects of vesting and non-vesting conditions on the measurement of cash-settled share-based payments; (ii) share-based payment transactions with a net settlement feature for withholding tax obligations; and (iii) a modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled. The amendments apply for annual periods beginning on or after January 1, 2018. As a practical simplification, the amendments can be applied prospectively. Retrospective, or early, application is permitted if information is available without the use of hindsight. The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

7. RECENT ACCOUNTING PRONOUNCEMENT (continued)

IFRIC Interpretation 22 – Foreign Currency Transaction and Advance Consideration

IFRIC 22 clarifies that the date of the transaction, for the purpose of determining the exchange rate, is the date of initial recognition of the non-monetary prepayment asset and deferred income liability, and that if there are multiple payments or receipt in advance, a date of transaction is established for each payment or receipt. IFRIC Interpretation 22 is effective from years beginning January 1, 2018, with early adoption permitted. The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

IFRIC 23 – Uncertainty over Income Tax Treatments

The Interpretation provides guidance on the accounting for current and deferred tax liabilities and assets in circumstances in which there is uncertainty over income tax treatments. The Interpretation is applicable for annual periods beginning on or after January 1, 2019. Earlier application is permitted. The Interpretation requires an entity to (i)contemplate whether uncertain tax treatments should be considered separately, or together as a group, based on which approach provides better predictions of the resolution; (ii) reflect an uncertainty in the amount of income tax payable (recoverable) if it is probable that it will pay (or recover) an amount for the uncertainty; and (iii) measure a tax uncertainty based on the most likely amount or expected value depending on whichever method better predicts the amount payable (recoverable). The Company intends to adopt the Interpretation in its financial statements for the annual period beginning on July 1, 2019. The extent of the impact of adoption of the Interpretation has not yet been determined. The Company is currently evaluating the impact of the adoption of these standards on its consolidated financial statements.

8. EXPENSES BY NATURE

Detail of the depreciation and amortization expenses

The depreciation expense of property, plant and equipment and the amortization expense of intangible assets have been charged to the consolidated statement of loss as follows:

	June 30 2017	June 30 2016
	$	$
Cost of contract revenue	8,729	9,306
General and administrative expenses	847	1,494
Total depreciation and amortization	9,576	10,800

Principal expenses by nature

Cost of contract revenue, general and administrative expenses, foreign exchange loss, finance costs and negative goodwill, by nature are as follows:

	June 30 2017	June 30 2016
	$	$
Depreciation and amortization	9,576	10,800
Employee benefits expense	68,489	56,277
Cost of inventories	30,679	24,823
Other expenses	24,301	21,061
Negative goodwill	-	(5,020)
Total cost of contract revenue, general and administrative expenses, foreign exchange loss, finance costs and negative goodwill	133,045	107,941

9. INVENTORIES

Inventories consist of the following:

	June 30 2017	June 30 2016
	$	$
Spare parts, net	12,311	11,680
Consumables, net	25,053	22,879
Other	1,361	730
	38,725	35,289

Spare parts mainly include motors and drill bits. Consumables mainly include limited life tools, rods, hammers, wire lines and casings.

The cost of inventories recognized as an expense and included in cost of contract revenue has been recorded as follows:

	June 30 2017	June 30 2016
	$	$
	30,679	24,823

During the year, an amount of $nil (2016: $326) has been accounted for as a write-down of inventories as a result of net realizable value being lower than cost. As at December 31, 2016, an amount of $295 has been accounted as a reversal of a write-down of inventory ($nil for the year ended June 30, 2016).

The Company's credit facilities are in part secured by a general assignment of the Company's inventories.

10. INVESTMENTS

Changes in investments were as follows:

	June 30 2017	June 30 2016
	$	$
Investments in public companies, beginning of year	709	424
Conversion of accounts receivable	60	-
Disposal of investments	(352)	(51)
Change in fair value of available for sale investments	265	336
Investments in public companies, end of year	682	709

The Company holds common shares in publicly traded companies. These shares are designated as available-for-sale and are reported at fair value, reflecting their quoted share price as at the reporting date. The original cost is $347 ($373 as at June 30, 2016). The gain on disposal of investments totalling $266 for the year ended June 30, 2017 is included in general and administrative expenses ($80 for the year ended June 30, 2016).

11. PROPERTY, PLANT AND EQUIPMENT

Changes in the property, plant and equipment balance were as follows:

	Land	Buildings and components	Drilling equipment	Vehicles	Other	Total
Cost	$	$	$	$	$	$
Balance as at July 1, 2016	841	9,848	74,770	15,604	2,886	103,949

Balance as at June 30, 2016	-	2,968	45,705	10,294	2,004	60,971
June 30, 2016:						
Net book value	841	6,880	29,065	5,310	882	42,978
Portion related to finance leases	-	-	3,394	339	-	3,733
June 30, 2017:						
Net book value	841	7,068	25,916	5,395	794	40,014
Portion related to finance leases	-	-	1,338	142	-	1,480

The gain on disposal of property, plant and equipment totalling $140 for the year ended June 30, 2017 (a gain of $329 for the year ended June 30, 2016) is included in cost of contract revenue. There was no impairment charge recognised for the years ended June 30, 2017 and 2016.

12. INTANGIBLE ASSETS

Changes in the intangible assets balance were as follows:

Drilling technology	Cost	Accumulated amortization	Total
	$	$	$
Balance as at July 1, 2015	2,912	(2,329)	583
Amortization	-	(583)	(583)
Balance as at June 30, 2016	2,912	(2,912)	-
Amortization	-	-	-
Balance as at June 30, 2017	2,912	(2,912)	-

Net book value:	
June 30, 2016	-
June 30, 2017	-

There was no impairment charge recognised for the years ended June 30, 2017 and 2016.

13. LONG-TERM DEBT

	June 30 2017	June 30 2016
	$	$
Loan authorized for a maximum amount of $25 million, bearing interest at prime rate plus 2.00%, effective rate as at June 30, 2017 of 4.70%, maturing December 2017, secured by first rank hypothec on the universality of all present and future assets (a) (b) (c)	13,571	7,403
Loan authorized for an amount of $2.5 million, bearing interest at prime rate plus 4.50%, effective rate as at June 30, 2017 of 7.20%, payable in monthly instalments of $52 as from June 2017, maturing May 2021, secured by second rank hypothec on the universality of all present and future assets (b)	2,434	-
Finance leases, bearing interest between 3.30% and 9.80% (June 30, 2016: 3.34% and 29.02%), maturing December 2020	983	1,933
	16,988	9,336
Current portion	(14,903)	(889)
	2,085	8,447

13. LONG-TERM DEBT (continued)

(a) The rate is variable based on the quarterly calculation of a financial ratio and can vary from prime rate plus 0.50% to 2.25%.

(b) An unamortized amount of $42 ($97 as at June 30, 2016), representing financing fees, has been netted against of the long-term debt. This amount is being amortized to earnings over the term of the debt, using the effective interest method.

(c) The Company provided a letter of credit to one of its subsidiaries's bank of US$1.0 million (or approximately CAN$1.3 million) from the credit facility. The purpose of the letter of credit is to provide performance bonds to secure drilling contracts with some of its customers.

Under the terms of the long-term debt agreement, the Company must satisfy certain restrictive covenants as to minimum financial ratios (Note 14). As at June 30, 2017, the Company was compliant with its financial covenants (June 30, 2016: the Company was compliant with its financial covenants).

As at June 30, 2017, the prime rate was 2.70% (2.70% as at June 30, 2016).

As at June 30, 2017, principal payments required in the next years are as follows:

	Loan	Finance lease	Total
	$	$	$
Within one year	14,225	720	14,945
Later than one year and not later than five years	1,822	263	2,085
	16,047	983	17,030

Minimum lease payments are as follows:

	Minimum lease payments	Present value of minimum lease payments	
		June 30 2017	June 30 2016
	$	$	$
Within one year	755	720	889
Later than one year and not later than five years	275	263	1,044
	1,030	983	1,933
Less: future finance charges	(47)	-	-
Present value of minimum lease payments	983	983	1,933

Long-term debt and finance leases by currency and by term are as follows:

As at June 30, 2017	Total	Within one year	Later than one but not later than five years
	$	$	$
CAN	16,132	14,212	1,920
Chilean Pesos (CLP439,920,163)	856	691	165
	16,988	14,903	2,085

14. CAPITAL MANAGEMENT

The Company includes share capital, equity settled reserve, retained earnings, long-term debt and finance leases and bank overdraft net of cash in its definition of capital.

The Company's capital structure is as follows:

	June 30 2017	June 30 2016
	$	$
Long-term debt and finance leases	16,988	9,336
Share capital	57,130	55,688
Equity settled reserve	1,178	1,468
Retained earnings	15,907	21,720
Cash	(1,601)	(2,293)
	89,602	85,919

The Company's objective when managing its capital structure is to maintain financial flexibility in order to i) preserve access to capital markets; ii) meet financial obligations and iii) finance internally generated growth and potential new acquisitions. To manage its capital structure, the Company may adjust spending, issue new shares, issue new debt or repay existing debts.

Under the terms of certain of the Company's debt agreements, the Company must satisfy certain financial covenants, such as Senior debt to earnings before income taxes, interest, depreciation and amortization ratio, Senior debt to capitalization ratio and fixed charge coverage ratio. Such agreements also limit, among other things, the Company's ability to incur additional indebtedness, create liens, engage in mergers or acquisitions and make dividend and other payments. As at June 30, 2017, as mentioned in Note 13, the Company complied with its covenants (June 30, 2016: the Company was compliant with its financial covenants).

In order to facilitate the management of its capital requirements, the Company prepares annual budgets that are updated as necessary, dependent on various factors.

The Company's objectives with regards to capital management remain unchanged from the prior year.

15. SHARE CAPITAL

Authorized, an unlimited number of common and preferred shares:

Common shares, participating and voting, without nominal or par value

Preferred shares rights privileges, restrictions and conditions must be adopted before their issuance by a resolution of the Board of Directors of the Company.

	June 30, 2017		June 30, 2016	
	Number of shares	$	Number of shares	$
Balance, beginning of the year	35,101,419	55,688	33,276,519	54,411
Shares issued:				
For share options exercised [(a)]	993,500	1,442	-	-
For business acquisition [(b)]	-	-	1,824,900	1,277
Balance, end of the year	36,094,919	57,130	35,101,419	55,688

[(a)] On February 28, 2017, the Company issued 942,000 common shares to the President and Chief Executive Officer in connection with the exercise of its options (see Note 19).

[(b)] As at December 30, 2015, the Company issued a total of 1,824,900 common shares for a total amount of $1,277 as part of the consideration for the acquisition of Captagua Ingeniería S.A. (see Note 2).

Net loss per share

Diluted net loss per common share was calculated based on net loss divided by the average number of common shares outstanding using the treasury shares method. Shares options are not included in the computation of diluted net loss per share as their inclusion would be anti-dilutive.

Net loss per share - basic and diluted	June 30 2017	June 30 2016
Net loss attributable to common shareholders	(5,874) $	(213) $
Weighted average basic number of common shares outstanding	35,504,686	34,188,969
Net loss per share - basic and diluted	(0.17) $	(0.01) $

15. SHARE CAPITAL (continued)

2007 share option plan

In January 2007, the Board of Directors adopted an equity settled share option plan (the 2007 Share Option Plan). The purpose of this plan is to retain, motivate and reward qualified directors, officers, employees and consultants of the Company.

The vesting and expiry terms of the outstanding options were modified in June 2008 and now vest at the rate of 50% 31 days after the closing date of the IPO and 25% on each of the first and second anniversary of the closing date of the IPO. The options will expire 10 years after the grant date.

2008 share option plan

Also, on June 26, 2008, the Company established the new equity settled option plan (the 2008 Share Option Plan), which is intended to aid in attracting, retaining and motivating the Company's officers, employees, directors and consultants. The new option plan has been prepared in accordance with the TSX's policies on listed company security-based compensation arrangements. Persons eligible to be granted options under the new option plan are: any director, officer or employee of Orbit Garant or of any subsidiary company controlled by any such person or a family trust of which at least one trustee is any such person and all of the beneficiaries of which are such person and his or her spouse or children.

The aggregate number of common shares which may be issued from treasury upon the exercise of options under the 2008 share option plan shall not exceed 10% of the issued and outstanding common shares (this limit does not include, for greater certainty, options outstanding under the 2007 share option plan). The number of common shares which may be reserved for issuance pursuant to options granted under the new option plan, together with common shares reserved for issuance from treasury under any other employee-related plan of the Company, or options for services granted by the Company to any one person, shall not exceed 5% of the then aggregate issued and outstanding common shares.

The Board of Directors, through the recommendation of the Corporate Governance and Compensation Committee, manages the 2008 Share Option Plan and determines, among other things, optionees, vesting periods, exercise price and other attributes of the options, in each case pursuant to the 2008 share option plan, applicable securities legislation and the rules of the TSX. Unless otherwise determined by the Board of Directors, options vest at a rate of 20% per annum commencing 12 months after the date of grant and expire no later than 7 years after the grant date. Options are forfeited when the option holder ceases to be a director, officer or employee of the Company. The exercise price for any option may not be less than the fair market value (the closing price of the common shares on the TSX on the last trading day on which common shares traded prior to such day, or the average of the closing bid and ask prices over the last five trading days, if no trades accrued over that period) of the common shares at the time of the grant of the option.

All share options outstanding are granted to directors, officers and employees. Details regarding the share options outstanding are as follows:

	June 30, 2017		June 30, 2016	
	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price
		$		$
Outstanding at the beginning of year	2,877,500	1.16	2,226,500	1.35
Granted during the year	500,000	1.75	732,000	0.70
Exercised during the year	(993,500)	1.02	-	-
Cancelled during the year	(47,500)	1.28	(81,000)	2.26
Outstanding at end of year	2,336,500	1.35	2,877,500	1.16
Exercisable at end of year	895,400	1.54	1,561,000	1.27

15. SHARE CAPITAL (continued)

On December 6, 2016, 500,000 share options have been granted to employees and directors giving the option to purchase a common share for an exercice price of $1.75 per share which represents the fair value of a common share at the date of the grant. These options have a life of 7 years and will vest at a rate of 20% per annum commencing 12 months after the date of the grant. On January 20, 2016, 732,000 share options have been granted to employees and directors giving the option to purchase a common share for an exercice price of $0.70 per share which represents the fair value of a common share at the date of the grant.

The following table summarizes information on share options outstanding at June 30, 2017:

Range of exercise price $	Outstanding at June 30, 2017	Weighted average remaining life (years)	Weighted average exercise price $	Exercisable at June 30, 2017	Weighted average exercise price $
0.50 - 1.49	1,353,000	4.63	0.87	497,400	0.95
1.50 - 2.49	966,000	4.39	1.98	380,500	2.20
3.50 - 4.49	17,500	1.19	4.00	17,500	4.00
	2,336,500			895,400	

The Company's calculations of the fair value of options granted were made using the Black-Scholes option-pricing model. The following table summarizes the grant date fair value calculations with weighted average assumptions:

	Granted in December 2016	Granted in January 2016
Risk-free interest rate	0.92%	0.63%
Expected life (years)	5	5
Expected volatility (based on historical volatility)	36.70%	40.00%
Expected dividend yield	0%	0%
Fair value of options granted	$0.58	$0.25

During the years mentioned below, the total expense related to share-based compensation to employees and directors has been recorded and presented in general and administrative expenses as follows:

	June 30 2017 $	June 30 2016 $
Expense related to share-based compensation	220	193

16. INCOME TAXES

Income tax expense recovery comprises the following:

	June 30 2017	June 30 2016
Current tax	$	$
Current year	480	(55)
Prior year adjustments	232	(38)
	712	(93)
Deferred tax		
Current year	(2,711)	(123)
Effect of corporate tax rate modification	6	-
	(2,705)	(123)
	(1,993)	(216)

The tax rates prescribed by the applicable laws were at 26.85% in 2017 and at 26.37% in 2016.

	June 30 2017	June 30 2016
	$	$
Loss before income taxes	(7,867)	(429)
Statutory rates	26.85%	26.37%
Income taxes recovery based on statutory rates	(2,112)	(113)
Increase (decrease) of income taxes due to the following:		
Non-deductible expenses and other	4	95
Non-deductible share-based compensation expense	59	51
Non taxable portion of capital gain	(35)	-
Non taxable negative goodwill	-	(1,324)
Difference of income rates between territories	20	-
Effect of corporate tax rate modification	6	-
Prior year adjustments	232	(38)
Income tax assets unrecognized	(167)	1,113
Total income taxes recovery	(1,993)	(216)

16. INCOME TAXES (continued)

Deferred income taxes are based on differences between the accounting and tax values of assets and liabilities and consist of the following as at the dates presented:

	July 1 2016	Recognized in statement of loss	Other	June 30 2017
	$	$	$	$
Deferred income tax assets:				
Intangible assets	39	110	-	149
Loss carried forward	2,364	2,271	-	4,635
Total deferred income tax assets	2,403	2,381	-	4,784
Deferred income tax liabilities:				
Investments	45	(14)	(1)	30
Property, plant and equipment	1,428	(310)	-	1,118
Total deferred income tax liabilities	1,473	(324)	(1)	1,148
Net deferred income tax liabilities (assets)	930	2,705	1	3,636

	July 1 2015	Recognized in statement of loss	Other	June 30 2016
	$	$	$	$
Deferred income tax assets:				
Intangible assets	(121)	141	19	39
Loss carried forward	3,103	(739)	-	2,364
Total deferred income tax assets	2,982	(598)	19	2,403
Deferred income tax liabilities:				
Investments	-	-	45	45
Property, plant and equipment	1,856	(428)	-	1,428
Total deferred income tax liabilities	1,856	(428)	45	1,473
Less: income tax assets unrecognized	(293)	293	-	-
Net deferred income tax liabilities (assets)	833	123	(26)	930

Tax losses for which no deferred tax assets was recognised expir as follow:

	June 30 2017	June 30 2016
Never expire	$	$
Chilean Pesos (CLP2,502,894,330)	4,873	-

17. ADDITIONAL INFORMATION RELATING TO THE STATEMENT OF CASH FLOWS

Changes in non-cash operating working capital items:

	June 30 2017	June 30 2016
	$	$
Trade and other receivables	(3,243)	3,224
Inventories	(3,436)	379
Prepaid expenses	(190)	878
Trade and other payables	3,619	175
	(3,250)	4,656

18. COMMITMENTS AND GUARANTEES

Commitments

The Company has entered into operating lease agreements expiring in 2021 which call for lease payments of $308 for the rental of vehicles. The Company has also entered into lease agreements for offices expiring in 2021 for minimum lease payments of $1,252. None of the operating lease agreements contain renewal or purchase options or escalation clauses or any restrictions. The minimum lease payments under these lease agreements for the next four years are detailed as follows:

	$
2018	620
2019	387
2020	379
2021	174

Lease payments recognised as an expense during the year amount to $2,096 (year ended June 30, 2016: $1,708). This amount consists of minimum lease payments. No sublease payments or contingent rent payments were made or received. No sublease income is expected as all assets held under lease agreements are used exclusively by the Company.

Guarantees

For the year ended June 30, 2017, the Company issued some bank guarantees in favor of customers for a total amount of $2,832, maturing in December 2017. For the year ended June 30, 2017, the Company has not made any payments in connection with these guarantees.

In March 2017, the Company provided a $US 1.0 millions letter of credit one of its subsidiaries's bank (or approximately CAN$1.3 million) from the credit facility. The purpose of the letter of credit is to provide performance bonds to secure drilling contracts with some of its customers. As at June 30, 2017, the subsidiary did not use this garantee to secure drilling contracts.

19. RELATED PARTY TRANSACTIONS

The Company is related to Dynamitage Castonguay Ltd., company owned by directors.

On February 28, 2017, the Company granted a loan maturing not later than February 28, 2019, for the amount of $1,237 to the President and Chief Executive Officer in connection with the exercise of its options to purchase 942,000 shares. The loan bears interest at the rate of 4% annually and is secured by a pledge of shares and a guarantee from 6707550 Canada Inc.

During the year, the Company entered into the following transactions with its related company and with persons related to directors:

	June 30 2017	June 30 2016
	$	$
Sales	102	25
Purchases	167	94

As at June 30, 2017 and as at June 30, 2016, there was no accounts receivable resulting from these transactions.

All of these related party transactions made in the normal course of business were measured at the exchange amount, which is the amount established and agreed to by the parties.

20. KEY MANAGEMENT COMPENSATION

The compensation recognized for key management remuneration and director's fees, is analyzed as follows:

	June 30 2017	June 30 2016
	$	$
Salaries and fees	1,433	1,287
Share-based compensation	204	149
	1,637	1,436

21. FINANCIAL INSTRUMENTS

The Company is exposed to various risks related to its financial assets and liabilities. There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks, or the methods used to measure them, from previous years, unless otherwise stated in this note.

Currency risk

The Company realizes a part of its activities in US dollars, in Chilean Pesos, in XOF and in GHS cedi and is thus exposed to foreign exchange fluctuations. The Company does not actively manage this risk. As at June 30, 2017, the Company had cash in US dollars for an amount of US$957 (June 30, 2016, US$1,473) and accounts receivable in US dollars for an amount of US$636 (June 30, 2016, US$640). The Company has cash in Chilean Pesos for an amount of CLP207,424,327 (June 30, 2016, CLP292,449,849) and accounts receivable in Chilean Pesos for an amount of CLP1,471,946,677 (June 30, 2016, CLP1,076,241,833). The Company has cash in GHS cedi for an amount of 26,065 (June 30, 2016, 131,758) and accounts receivable in GHS cedi for an amount of 1,561,986 (June 30, 2016, 519,382). The Company has cash in XOF for an amount of 12,751,223 (June 30, 2016, nil).

As at June 30, 2017, the Company has estimated that a 10% increase or decrease of the US exchange rate would have caused a corresponding annual increase or decrease in net loss and comprehensive loss of $142 (June 30, 2015, $197), a 10% increase or decrease of the Chilean Pesos exchange rate would have caused a corresponding annual increase or decrease in net loss and comprehensive loss of $183 (June 30, 2016, $23), and a 10% increase or decrease of the GHS cedi exchange rate would have caused a corresponding annual increase or decrease in net loss and comprehensive loss of $29 (June 30, 2016, $66) and a 10% increase or decrease of the XOF exchange rate would not have caused a significant increase or decrease in net loss and comprehensive income.

Credit risk

The Company provides credit to its customers in the normal course of its operations. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. It carries out, on a continuing basis, credit checks on its customers and maintains provisions for contingent credit losses. Demand for the Company's drilling services depends upon the level of mineral exploration and development activities conducted by mining companies, particularly with respect to gold, nickel and copper.

In order to reduce the credit risk, the Company is using insurance coverage from Export Development Canada («EDC») on certain accounts receivable from its customers. The insurance program provides under certain terms and conditions an insurance coverage amount of up to 90% of accounts receivable. As at June 30, 2017, the amount of the insurance coverage from EDC represents 5% of the accounts receivable (7% as at June 30, 2016).

The carrying amounts for accounts receivable are net of allowances for doubtful accounts, which are estimated based on aging analysis of receivables, past experience, specific risks associated with the customer and other relevant information. The maximum exposure to credit risk is the carrying value of the financial assets.

21. FINANCIAL INSTRUMENTS (continued)

The allowance for doubtful accounts is established based on the Company's best estimate on the recovery of balances for which collection may be uncertain. Uncertainty of collection may become apparent from various indicators, such as a deterioration of the credit situation of a given client or delay in collection when the aging of invoices exceeds the normal payment terms. Management regularly reviews accounts receivable and assesses the appropriateness of the allowance for doubtful accounts.

The change in the allowance for doubtful accounts is detailed below:

	June 30 2017	June 30 2016
	$	$
Balance at beginning of year	1,074	1,010
Change in allowance, other than write-offs and recoveries	348	383
Write-offs of accounts receivable	(149)	(298)
Recoveries	(44)	(21)
Balance at end of year	1,229	1,074

As at June 30, 2017, 58% (June 30, 2016: 53%) of the trade and other receivables are aged as current and 5% are impaired (June 30, 2016: 5%).

Two major customers represent 25% of the trade accounts receivable as at June 30, 2017 (June 30, 2016, one major customer represents 10% of these accounts).

Two major customers represent 29% of the contract revenue for the year ended June 30, 2017 (year ended June 30, 2016, two major customers represent 39%).

Credit risk also arises from cash and cash equivalents with banks and financial institutions. This risk is limited because the counterparties are mainly Canadian banks with high credit ratings.

The Company does not enter into derivatives to manage credit risk.

Interest rate risk

The Company is subject to interest rate risk since a significant part of the long-term debt bears interest at variable rates.

As at June 30, 2017, the Company has estimated that a 1% increase or decrease in interest rates would have caused a corresponding annual increase or decrease in net loss of $117 (June 30, 2016, $55).

Equity market risk

Equity market risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors the general trends in the stock markets and individual equity movements, and determines the appropriate course of actions to be taken by the Company.

21. FINANCIAL INSTRUMENTS (continued)

Fair value

The fair value of cash, trade and other receivables, trade and other payables and factoring liabilities is approximately equal to their carrying values due to their short-term maturity.

The fair value of long-term debt approximates its carrying value as it bears interest at a variable rate and has financing conditions similar to those currently available to the Company.

The fair value of loan receivable approximates its carrying value as the interest rate was established based on market conditions and the interest rates on the market have not changed significantly since the loan was granted.

Fair value hierarchy

The methodology used to measure the Company's financial instruments accounted for at fair value is determined based on the following hierarchy:

Level	Basis for determination of fair value
Level 1	Quoted prices in active markets for identical assets or liabilities.
Level 2	Inputs other than quoted prices included in Level 1 that are directly or indirectly observable for the asset or
Level 3	Inputs for the asset or liability that are not based on observable market data.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

As at June 30, 2017, the investments are classified as a Level 1 financial instrument as the fair value is determined using quoted prices in the active markets.

There were no transfers of amounts between Level 1, Level 2 and Level 3 financial instruments for the year ended June 30, 2017. For the year ended June 30, 2016, the investments were transferred from Level 2 to Level 1 because there is now an active market to determine quoted prices.

21. FINANCIAL INSTRUMENTS (continued)

Liquidity risk

Liquidity risk arises from the Company's management of working capital, the finance costs and principal repayments on its debt instruments. It is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. In Note 14 are details of undrawn facilities that the Company has at its disposal to further reduce liquidity risk.

The Company enters into receivable purchase agreements (commonly referred to as "factoring agreements") with different banks as part of its normal working capital financing. The Company receives 100% of the value of the specific sales invoice less a charge between 0.46% and 0.52%. As at June 30, 2017, trade receivables include $705 related to factored accounts ($1,395 as at June 30, 2016).

The following tables present the contractual cash flows for the financial liabilities based on their remaining contractual maturities.

				As at June 30, 2017
	Total	0 -1 year	2 - 3 years	4 - 5 years
	$	$	$	$
Trade and other payables	18,981	18,981	-	-
Factoring liabilities	705	705	-	-
Long-term debt	16,047	14,225	1,822	-
Finance lease	983	720	221	42
	36,716	34,631	2,043	42

				As at June 30, 2016
	Total	0 -1 year	2 - 3 years	4 - 5 years
	$	$	$	$
Trade and other payables	15,362	15,362	-	-
Factoring liabilities	1,395	1,395	-	-
Long-term debt	7,500	-	7,500	-
Finance lease	1,933	889	1,044	-
	26,190	17,646	8,544	-

22. SEGMENTED INFORMATION

The Company is separated into two geographical reportable segments: Canada and International (US, Central, South America, West Africa and Kazakhstan). The elements of the results and the financial situation are divided between the segments, based on destination of contracts or profits. Data by geographical areas follow the same accounting rules as those used for the consolidated accounts. Transfers between segments are carried out at market prices.

Operational sectors are presented using the same criteria as for the production of the internal report to the chief operating decision maker, who allocates the resources and evaluates the performance of the operational sectors. The chief operating decision maker is considered as the President and Chief Executive Officer, who evaluates the performance of both segments by the revenues of ordinary activities from external clients and earnings (loss) from operation.

22. SEGMENTED INFORMATION (continued)

Data relating to each of the Company's reportable operating segments are presented as follows:

	June 30 2017 $	June 30 2016 $
Contract revenue		
Canada	99,259	92,449
International	25,919	15,063
