Cautionary Statements

Forward-Looking Information

Certain statements contained herein constitute “forward-looking statements” which reflect the current expectations of management regarding the Company’s future growth, results of operations, performance, business prospects and opportunities based on information currently available to it. Wherever possible, words such as “may”, “would”, “could”, “will”, “anticipate”, “believe”, “plan”, “expect”, “intend”, “estimate”, “aim”, “endeavor” and similar expressions have been used to identify these forward-looking statements. These statements reflect management’s current beliefs with respect to future events and are based on information currently available to management. Forward-looking statements involve significant known and unknown risks, uncertainties and assumptions. Many factors could cause actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, without limitation, those listed in the “Risk Factors” section of the company’s public filings. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results, performance or achievements could vary materially from those expressed or implied by the forward-looking statements. These factors should be considered carefully and prospective investors should not place undue reliance on the forward-looking statements. Although the forward-looking statements contained herein are based upon what management currently believes to be reasonable assumptions, there can be no assurance that actual results, performance or achievements will be consistent with the forward-looking statements. Forward-looking statements are made as of the date hereof and Orbit Garant may not, and does not assume any obligation to, update or revise these forward-looking statements other than as specifically required by applicable law. For more information concerning the Company’s risks and uncertainties, please refer to the Company’s most recent MD&A and Annual Information Form which are available on www.sedar.com.

Non-IFRS Measures

This presentation makes reference to certain non-IFRS measures, including EBITDA and Adjusted Gross Margin, that do not have standardized meanings prescribed by IFRS and could be calculated differently by other companies. The Company believes that these measures, when presented in conjunction with comparable IFRS financial measures, are useful to investors and other readers because the information is an appropriate measure to evaluate the Company’s operating performance. Internally, the Company uses this non-IFRS financial information as an indicator of business performance. These measures are provided for information purposes, in addition to, and not as a substitute for, measures of financial performance prepared in accordance with IFRS. EBITDA is defined as net earnings (loss) before interest, taxes, depreciation and amortization. Adjusted gross margin is defined as contract revenue less operating costs. Operating expenses comprise material and service expenses, personnel expenses, other operating expenses, excluding depreciation. Please refer to reconciliation in Appendix.

Drilling Services

* For the 12 months ended June 30, 2021

Diversified revenue mix with a weighting towards gold and major / intermediate mining companies

Competitive Strengths

- Long-established, leading Canadian-based mineral driller focused on gold projects
- Combined surface and underground expertise / specialized drilling / senior management field experience
- Focus on continuous innovation
- Vertically-integrated manufacturing operations
- Strong health & safety and driller training programs
- Long-standing customer relationships
- Growing presence in strategic international markets enhances metals, customer and geographic diversification

Well positioned to continue building market share

Drilling Services & Expertise

Surface

- Standard diamond coring / core rod
- Standard / reverse circulation (deep hole)
- AWL - PWL calibre
- Geotechnical drilling
- Directional core drilling

Underground

- Standard rod / core rod
- AWL - HWL calibre
- Geotechnical drilling
- Directional core drilling

Specialized Drilling

- Drilling projects that are in remote locations or, because of the scope, complexity or technical nature of the work, cannot be undertaken by smaller conventional drilling companies

Full service offering with expertise in specialized drilling

Vertical Integration / Health & Safety / Driller Training

- Vertically integrated manufacturing operations provide competitive advantage
 - Ability to design and manufacture custom drill rigs and equipment for customers at a competitive cost with faster delivery
 - Key to continuous innovation (e.g. computerized control and monitoring technology)
 - In-house drill rig maintenance / modifications supports optimum utilization rates and performance
- Health & Safety and Environmental practices align with, or exceed, the strict requirements of senior mining companies
- Driller training program in Val-d'Or
- Ongoing training for new technologies, techniques and safety / environmental standards

Superior quality and customer value

Continuous Innovation

Computerized Monitoring and Control Technology

Performance Highlights

- Greater accuracy
- Improved productivity (+30%)
- Fewer consumables
- Rig components last longer
- Easier to train personnel

Additional Feature Benefits for Customers

- Real-time, remote monitoring of drilling progress
- Ability to view core samples remotely

Competitive differentiation through innovation

Strong Customer Relationships

BHP

GLENCORE

Core competitive strengths support long-term customer relationships

International Operations

Chile / South America

- Operating subsidiary established in Chile (FY 2013)
- Acquisition of Captagua in FY 2016
- Strong platform for growth in Chile / South America
- 18 surface drill rigs / 8 underground drill rigs as at June 30, 2021

West Africa

- Operating subsidiaries established in Ghana (FY 2015), Burkina Faso (FY 2016), and Guinea (FY 2021)
- Acquisition of the drilling business of Projet Production International in Burkina Faso (Q2 2019)
- 22 surface drill rigs / 5 underground drill rigs as at June 30, 2021

International Revenue (\$ millions)¹

1) International revenue in FY 2020 and FY 2021 reflects the negative impact of the COVID-19 pandemic. The revenue decline in FY 2020 also reflects the conclusion of a multi-year drilling contract in Chile at the beginning of Q4 FY2019. Drilling activity in West Africa returned to pre-pandemic levels during FY 2021, but remained below pre-pandemic levels in Chile.

Orbit Garant is bringing its combined surface and underground drilling expertise to international markets

Declining Global Gold Discoveries

Global Gold Discoveries vs. Exploration Spending, 1990-2019

- Gold discovery rates are down significantly from the 1990s and 2000s despite high exploration spending
- No major gold discoveries in recent years

Declining Reserves in Global Gold Sector

Major Gold Producers' Years of Reserves Remaining, 2010 vs. 2019

S&P Global
Market Intelligence

■ 2010 years remaining
■ 2019 years remaining

- The mineable reserves of most senior gold producers have dropped sharply, driving the need for significant spending on exploration and mine development

Global Exploration Budgets

Annual nonferrous exploration budgets, 1997-2021

S&P Global

Market Intelligence

- 2020 aggregate global nonferrous exploration budgets totaled an estimated **US\$8.7 billion**
 - ◆ ~11% decline from 2019 due to impact of COVID-19
- Smaller than expected year-over-year decline due to rapid recovery of mining industry following project shutdowns
- Positive outlook for nonferrous exploration budgets:
 - ◆ Budgets expected to increase to **~US\$11.2 billion** in 2021
 - ◆ Further growth of 5% to 15% expected in 2022

Exploration budgets have recovered from lows in 2016 and from impact of COVID-19 in 2020

Global Exploration Budgets

Annual nonferrous exploration budgets by company type, 1997-2021

Junior companies providing increasing share of global exploration spending in 2020-2021

Global Exploration Budgets

Annual nonferrous exploration budgets by project type, 1997-2021

Shift in exploration focus from grassroots to minesite over the past two decades

Gold Price (USD\$) (September 29, 2021)

- Spot gold price reached record high of ~US\$2,075 per ounce in August 2020
- Current price of gold is ~54% above its trailing 5-year low in late 2016
- Strengthening price of gold supports: improved access to capital for mining companies, and increased mineral exploration and development spending
- Gold-related operations accounted for ~76% of Orbit Garant's revenue during Fiscal 2021

Strong incentive for gold miners to boost exploration and development budgets

Copper Price (USD\$) (September 29, 2021)

- Copper price reached record level of ~US\$4.90 per pound in May 2021
- Strong post-pandemic demand outlook
 - Short-term COVID-related stimulus measures also boosting demand
- Copper supply expected to lag demand over next several years
- Current price provides strong support for Orbit Garant's Chilean operations

High copper price supports strong profits for miners and growth in exploration spending

On March 8, 2021, Orbit Garant and National Bank of Canada Inc. entered into a Fourth Amended and Restated Credit Agreement in respect of the Company's Credit Facility. Pursuant to the Fourth Amended and Restated Credit Agreement, the Credit Facility consists of a \$35.0 million revolving credit facility and a US\$5.0 million revolving credit facility guaranteed by Export Development Canada. The current term of the Credit Facility expires on November 2, 2022.

COVID-19 Update

- Drilling activity in Canada and West Africa has either returned to, or surpassed, pre-pandemic levels
 - Operations in Ontario and Quebec have continued without significant disruption during calendar year 2021 amid provincial lockdown orders
 - Expanding drill fleet in West Africa to accommodate rising demand
- Drilling activity in Chile remains below pre-pandemic levels, but demand is increasing
 - New long-term contract commenced during Q3 2021
- Precautionary health and safety measures implemented across OGD's operations
- Recorded a benefit of \$3.6 million related to the Canada Emergency Wage Subsidy program during Q4 2020, a benefit of \$2.6 million during Q1 2021, and benefits totaling \$0.6 million over the subsequent three quarters in Fiscal 2021
- Increased financial flexibility through amended financing agreements with lenders, \$1.7 million of loans secured by Chilean subsidiary in May 2020, and a \$3.8 million reduction in debt and lease liabilities in Fiscal 2021

Orbit Garant considers the health & safety of its personnel and the communities in which it operates to be a top priority

Investment Highlights

- Industry leader in innovation and specialized drilling (underground & surface)
- Comprehensive infrastructure with vertically-integrated manufacturing operations
- Low-risk, diversified exposure to mining sector
- High exposure to gold-related projects – gold prices remain strong
- Strong presence in Canada (gold) and Chile (copper) – two of the most significant mineral exploration markets in the world
- Growing presence in West Africa – a rapidly growing market for mineral exploration
- Mineral exploration and resource development spending expected to increase 25% to 35% in 2021 and further growth of 5% to 15% expected in 2022 (Source: S&P Market Intelligence)
- OGD expects to increase capacity utilization and driller productivity as positive mining industry cycle progresses to generate margin growth

Well positioned to continue building market share and stakeholder value

Reconciliation of Non-IFRS Financial Measures

- “EBITDA”: Net earnings (loss) before interest, taxes, depreciation and amortization. Management believes that EBITDA is an important measure when analyzing its operating profitability, as it removes the impact of financing costs, certain non-cash items and income taxes. As a result, Management considers it a useful and comparable benchmark for evaluating the Company’s performance, as companies rarely have the same capital and financing structure.

Add:				
Finance costs	0.5	0.6	2.3	2.7
Income tax expense (recovery)	0.5	(0.4)	2.5	0.2
Depreciation and amortization	2.4	2.8	10.5	11.3
EBITDA	1.2	0.3	17.6	6.8

- “Adjusted gross profit and margin”: Contract revenue less operating costs. Operating expenses comprise material and service expenses, personnel expenses, other operating expenses, excluding depreciation. Although adjusted gross profit and margin are not recognized financial measures defined by IFRS, Management considers them to be important measures as they represent the Company’s core profitability, without the impact of depreciation expenses. As a result, Management believes they provide useful and comparable benchmarks for evaluating the Company’s performance.
