### 2. BASIS OF PREPARATION

#### Basis of presentation

These interim condensed consolidated financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting*, ("IAS 34"). The IFRS accounting policies that are set out in Note 3 to the Company's annual audited consolidated financial statements for the year ended June 30, 2024 were consistently applied to all periods presented. These interim condensed consolidated financial statements have not been subject to a review engagement by the Company's independent auditors.

The preparation of interim condensed consolidated financial statements in conformity with IAS 34 requires the use of certain critical accounting estimates, assumptions and judgments. It also requires Management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant are disclosed in Note 4 in the Company's annual audited consolidated financial statements for the year ended June 30, 2023. They remained unchanged for the three and six-month periods ended December 31, 2024.

### 2. BASIS OF PREPARATION (continued)

#### Principles of consolidation

The interim condensed consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company. A subsidiary is an entity controlled by the Company. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee, independently of its percentage of participation. The existence and effect of potential voting rights are considered when the Company controls another entity.

Income and expenses of subsidiaries acquired or disposed of during the year are included in the interim condensed consolidated statement of earnings from the effective date of acquisition to the effective date of disposal, as appropriate. Intercompany transactions and balances are eliminated on consolidation.

### 19. FINANCIAL INSTRUMENTS (continued)

#### *Fair value hierarchy*

The methodology used to measure the Company's financial instruments accounted for at fair value is determined based on the following hierarchy:

Level	Basis for determination of fair value
Level 1	Quoted prices in active markets for identical assets or liabilities.
Level 2	Inputs other than quoted prices included in Level 1 that are directly or indirectly observable for the asset or liability.
Level 3	Inputs for the asset or liability that are not based on observable market

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

As at December 31, 2024, the investments are measured at fair value and are classified as a Level 1 financial instrument as the fair value is determined using quoted prices in the active markets.
